We approve the extension of the response date to April 30, 2008. We find there is good cause to allow more time to resolve the conflicting guidance on withholding information. The DOE Office of Naval Reactors has informed us that George Stephani will be contacting you help clarify the guidance.

Subject: Request for Extension related to redacted version of SNM-124 Part II

Kevin,

Per our phone conversation on Monday, April 14, I am requesting additional time to resolve the issue with the redacted version of SNM-124 Part II. I hope that we can bring the issue to closure by April 30, 2008.

Thanks,
Jennifer
