Dear Scott Newberry,

Nuclear power energy is not a viable solution to America's energy needs. I am particularly concerned about the opening of the Watts Bar Nuclear Power Plant. The reported problems with quality assurance and quality inspection make the opening of this plant seem highly ~~problem~~ dangerous. This is especially true in light of the fact that the Nuclear Regulatory Commission has predicted a 45% possibility of a meltdown accident and the Watts Bar plant was rated with the highest probability. Therefore, aside from making your commission look extremely environmentally ignorant, licensing the Watts Bar Plant may lead to a local catastrophe.

Sincerely,
Amy Marr
