Subject: Re: Scoping Meeting

Laura,

I just sent an update of the CCNPP3 page to web services. It is about the scoping meeting. The CCNPP3 page is generally consistent with the other COL application pages. These pages have considerably less info than the LR pages as you note. If there appears to be a need to add additional info please let me know what you think and I'll discuss it with Joe.

Please let me know when the meeting notice for the scoping meeting is up so I can add the link.

Thank you.

Actually I thought there were a lot of things missing on the key milestone table for one the FRN for Notice of Intent to PRepare an Enviornmental Impact Statement and conduct Scoping is not on there it was published 2/14 and the meeting. This is what I am used to seeing as the table of key milestone and it as a lot more info http://www.nrc.gov/reactors/operating/licensing/renewal/applications/palisades.html I am not sure why New reactors is not doing it like this. Tom can you look into this and see who is in charge of the website and if we can add something like they have in license renewal to make the table more complete.

My original question was probably not clear. There is a place for meetings on the Calvert Cliffs page at

http://www.nrc.gov/reactors/new-licensing/col/calvert-cliffs.html

I was asking if the scoping meeting info should be there also. If yes I can do it or you can.

Thanks.

John,

It probably should be on the public web page. I copied Laura Quinn because she may know if the scoping meeting will be put on the Web thru DSER processes.

Laura, please let John know if the notice will be posted on the public website.

Thanks,
Tom F.

Tom,

When you notice the scoping meeting should we also put it on the public webpage? If so please let me know when you notice it and I'll get the webpage revised.

Thanks.
