Subject: RE: Calvert Cliffs Application for Additional Nuclear Unit

Kathy,

The State of MD is expected to be present at the site audit. If that's a convenient time and venue for you, we could arrange a meeting there. Or, we could try to arrange another time & place.

For your information, NRC also contacted Jeff Trulick in the Baltimore District.

I would appreciate a copy your jurisdiction checklist.

The site audit is an information gathering effort. NRC will examine the underlying documents used by the applicant to support it's environmental report. To the extent that the staff will rely on that information to produce its EIS, the information will be requested for placement on the docket. If the staff requires additional information, a request for additional information (RAI) will be sent to the applicant. The result of the site audit is a collection of information, potentially supplemented by an RAI, which will be publicly available. I can send that to you when it becomes available.

Sincerely,
Tom Fredrichs

Thank you for contacting me. I'd like a copy of the results of the site audit. I have already done the field work for the jurisdictional determination and I sent them a checklist for the information the Corps needs to evaluate the project. Do you want a copy of the checklist?

Can we meet to go over the NRC and Corps processes so that this can be a joint effort along with the State of Maryland?

Thank you,

Kathy Anderson

Subject: Calvert Cliffs Application for Additional Nuclear Unit

Dear Ms. Anderson,

John Price of Unistar referred me to you. Unistar submitted a combined operating license (COL) application to the US NRC to build and operate a third nuclear unit at their Calvert Cliffs site in MD.

The NRC plans to audit the environmental information presented by Unistar in its COL application during Mar. 17 - 21, 2008. The audit will take place at the plant site. If you would like information about the site audit, or would like to observe it, please contact me.

Thanks,

Thomas L. Fredrichs
