I would like to express my oppossition to Energy Solutions plans and ask the NRC to reject their application #'s IW023 and XW003.

We do not need to be processing Italy's nuclear waste. Let them deal with it themselves.

It is not an issue for profit making (nuclear) in my view. My state does not want or need more toxic debris from outside sources. We have enough with Oak Ridge, etc...

Stop this (and other) sources of nuclear pollution for the good of our nations health and future.

Thank you.
