SUBJECT: MEETING TO DISCUSS PROPOSED GENERAL ELECTRIC – HITACHI URANIUM ENRICHMENT FACILITY

Dear Mr. Rynas:

On April 30, 2008, General Electric – Hitachi (GEH) announced plans to construct and operate a laser-based uranium enrichment facility in Wilmington, North Carolina. To begin construction of this facility, GEH must obtain a license from the U.S. Nuclear Regulatory Commission (NRC). NRC's license application review process includes both safety and environmental reviews.

As part of the environmental review process, we would like to meet with you to discuss the proposed enrichment facility, our environmental review process, and any applicable New Hanover County permitting and environmental review processes. Is it possible for you to meet with us during the week of July 14, 2008?

Christianne Ridge, of my staff, will contact you to arrange a meeting. She can be reached at 301-415-5673. We would appreciate the opportunity to meet with you to share information about NCDENR and NRC environmental reviews relevant to the proposed facility. In addition, we plan to hold a public meeting at the University of North Carolina, Wilmington campus on July 17, 2008 to explain our licensing process and answer questions from members of the community. We would welcome you and any other interested NCDENR staff to attend this public meeting.

Sincerely,
