Wilmington, NC 28401

SUBJECT: MEETING TO DISCUSS PROPOSED GENERAL ELECTRIC – HITACHI URANIUM ENRICHMENT FACILITY

Dear Mr. Springer:

On April 30, 2008, General Electric – Hitachi (GEH) announced plans to construct and operate a laser-based uranium enrichment facility in Wilmington, North Carolina. To begin construction of this facility, GEH must obtain a license from the U.S. Nuclear Regulatory Commission (NRC). NRC's license application review process includes both safety and environmental reviews.

As part of the environmental review process, we would like to meet with you to discuss the proposed enrichment facility, our environmental review process, and any specific comments or questions you might have about the project. Is it possible for you to meet with us in Wilmington during the week of July 14, 2008?

Christianne Ridge, of my staff, will contact you to arrange a meeting. She can be reached at 301-415-5673. We would appreciate the opportunity to meet with you. In addition, we plan to hold a public meeting at the University of North Carolina, Wilmington campus on July 17, 2008 to explain our licensing process and answer questions from members of the community. We would welcome you and members of your staff to attend this public meeting.

Sincerely,

/RA/

Gregory F. Suber, Branch Chief
