SUBJECT: STATUS OF NRC'S REVIEW OF UNC-NEW HAVEN, CONNECTICUT DECOMMISSIONING PLAN, FINAL STATUS SURVEY PLAN AND DERIVED CONCENTRATION GUIDELINE LEVELS FOR DECOMMISSIONING

Dear Mr. Bonito:

This is in reference to the above documents which outline your decommissioning plans for the former UNC manufacturing facility located in New Haven, Connecticut.

1. Regarding the Decommissioning Plan for 71 Shelton Avenue, New Haven, Connecticut site dated June 7, 2005: we are returning this document as it appeared to contain no substantive changes from the original decommissioning plan that you submitted in the letter dated August 17, 1998, and which was approved by NRC in the letter dated April 6, 1999. If you believe that our review of this document is incorrect or incomplete, please inform us in writing within 30 days of the date of this letter. Otherwise, we will assume that you will promptly commence decommissioning activities in accordance with the decommissioning plan dated August 17, 1998.

2. Regarding your Final Status Survey Plan (FSSP) dated September 6, 2006 and the letters dated November 29, 2007 and March 12, 2008 responding to our requests for additional information regarding your FSSP: we have no further questions at this time.

3. Regarding the Derived Concentration Guideline Levels (DCGL) for Decommissioning the former UNC Manufacturing Facility, letter dated May 21, 2008, and the *Derived Concentration Guideline Levels (DCGL) for Decommissioning the former UNC Manufacturing Facility, Revision 1*, letter dated June 23, 2008; we have reviewed your input assumptions to the calculations and have no technical issues or questions regarding your non-contamination footprint. However, we will still need to review your final status survey report before approving the release of this site.

We have completed our review of the above documents which outline your decommissioning plans for the former UNC manufacturing facility located in New Haven, Connecticut and we expect that you will begin to initiate decommissioning activities promptly. We will maintain contact with you to schedule site visits throughout the decommissioning process. If you need additional information or assistance, please contact either Michelle Beardsley at 610-337-6942 or Laurie Kauffman at 610-337-5323.

Thank you for your cooperation.

Sincerely,

Original signed by Michelle Beardsley

Raymond K. Lorson, Chief
Decommissioning Branch
Division of Nuclear Materials Safety
