Subject: Information on Previous NRC Reviews

Kevin –

The practice and technique regarding multiple failures of the same administrative IROFS was used in the approved BPF and FUEL ISA Summaries. In addition, this specific issue was included in RAI question N1 from the Site-Wide ISA Summary Review (Reference Fax from Mike Lamastra to Jennifer Wheeler, dated January 3, 2007, "NFS Site-wide ISA Summary Review Nuclear Criticality Safety"). NFS responded to the RAI question via Letter from B.M. Moore to NNMS-NRC, dated March 2, 2007, "NFS Additional Responses to NRC Site-Wide ISA Summary Review Questions General Comment, N1-N8 (#5-12), and F2 (#23)". NRC accepted our responses to the NCS questions via e-mail from M. Lamastra to E. Senter, dated April 17, 2007, "NFS Responses to 3 Open RAI Questions". This was also documented in Letter from B.M. Moore to NNMS-NRC, dated May 24, 2007, "NFS Response to NRC Site-Wide ISA Summary Review Questions General Comment, N1-N8 (#5-12), and General". The ISA Summary was approved via letter M. Tschiltz to B.M. Moore, dated August 24, 2007, "Approval of Site-Wide Integrated Safety Analysis Summary".

Please feel free to contact us if you have any questions.
