Nuclear-2

Secretary, U. S. Nuclear Regulatory Commission _____2008

Washington, D. C. 20555-0001

DOCKETED
USNRC

Attn: Rulemaking and Adjudication Staff

March 13, 2008 (9:19am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Gentlepersons:

I am strongly opposed to EnergySolutions Inc's proposal to import nuclear waste from Italy's nuclear power industry to be dumped into the United States at EnergySolutions dump in Tooele County, Utah.

Full Congressional Hearings should be held to explore the existence and/or extent of any Mafia link between EnergySolutons Inc., Italy, and any other foreign countries attempting to dump their nuclear waste in the U.S.

On Oct. 9, 2007 England's newspaper, THE GUARDIAN, reported that several high officials in Italy's Energy research Agency (Enea) are being investigated for working closely with the Mafia to get rid of 600 drums of toxic and radioactive nuclear waste from Italy, Switzerland, ***France***, and Germany with its eventual dumping in Somalia, Africa.

The highly regarded British medical journal, The Lancet Oncology, has detailed higher rates of many types of cancer among Italians living near illegal rubbish dumps owned and managed by the Italian Mafia.

Not a single ounce of nuclear waste should enter the US from Italy until a full Congressional Investigation has examined all potential mafia links.
