Subject: Re: STP COLA Environmental Review Schedule

Hi Hosung,

Thanks for bringing this up with me. I will try to set up a meeting for tomorrow morning with Nona, Rajiv, Cristina and yourself to talk about how the geotechnical field data can impact the EIS schedule.

regards,

Paul

All,

While I talked with our geoscience group (Yong Yi, etc.), I noticed that they delayed their Safety Analysis Phase I schedule (draft PSER with RAIs) till 11/26, mainly because of the lack of sufficient data, esp. on the geotechnical field data and the plans for excavation and dewatering. The geoscience group said that the applicant will hire a geotechical company and will do the work again, then submit a supplemental data with a excavation/denaturing plan by the end of third quarter of this year.

It will not affect hydrologic safety analysis. However, the geotechnical information and dewatering plan will affect the assessments of construction impacts and wetland impact assessments, thus for EIS scheduling. This issue need to be discuss.

Hosung
