Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - IMPROPER SNUBBER INSTALLATION -
- WBRD-50-390/81-67, WBRD-50-391/81-63 - SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector D. Quick on August 11, 1981 in accordance with 10 CFR 50.55(e) as NCR 3287R. Our final report was submitted September 10, 1981.

In that final report, TVA committed to complete corrective actions by March 1, 1982. However, as discussed with Inspector R. V. Crlenjak on April 12, 1982, TVA has not completed this item. We now expect this commitment to be completed by June 30, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
