Dear Sir/Madam:

We would like to amend our current NRC license to reflect to the following change. Due to the imminent purchase of our current site, we would like to request that this amendment be expedited so that we may move to the new site. Once we have moved the department, we can perform and forward the required close-out survey of the current site for you approval so that it may be released.

ITEM #1
Please find the enclosed diagram for the additional location of use under the above noted byproduct license.

Once we have received approval for an additional location of use, we will perform the required close-out survey of our current site and forward the information to you for approval.

Please note that this is a single story building with no areas above or below. Also, there are no room numbers assigned to the nuclear medicine area.

Upon receipt of this amendment, we will commence receipt and use of byproduct materials at this facility and will follow all conditions of our existing license.

If you have any questions or require additional information, please contact our physics consultants, Sharon Updyke at (734) 662-3197 or fax (734) 662-9224.
