January [illegible], 1986

Carl,

Fred [illegible] has asked [illegible] we expect answers to questions posed in the attached memorandum to you and Harold Denton regarding Inspection [illegible].

My view is that questions of a kind posed by Congressional staff in the attached memorandum and in the same twenty other OIA related memoranda sent by me to you and/or NRC staff in the last year need not be answered merely to satisfy the curiosity of Congressional staff.

I believe all such questions in the cited memoranda are relevant to licensing decisions affecting TVA nuclear facilities. While I realize that some people might believe that not all were relevant, there is no question but that most are. Therefore, I would have expected that the Commission and NRC staff would require that the bulk of such questions be answered in order that the Commission might be assured that the NRC's responsibilities [illegible] protection of the public health and safety were being [illegible].

Henry
