Atlanta, Georgia 30323

Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNIT 2 - NON-INDEPENDENT CONTROL POWER SUPPLY TO AUXILIARY FEEDWATER PUMPS - WBRD-50-391/85-24 - SECOND SUPPLEMENTAL FINAL REPORT

The subject deficiency was initially reported to NRC-OIE Inspector Al Ignatonis on July 26, 1985 in accordance with 10 CFR 50.55(e) as SCR WBN EEB 8524. Our final report was submitted on August 14, 1985 and a supplemental final report was submitted on September 13, 1985. Below is our second supplemental final report.

As discussed with Gordon Hunegs on March 19, 1986, the date of January 31, 1986 for completion of the corrective actions indicated in our final report was not met. Corrective action was delayed because of the stop work order on cable pulling. The work has been rescheduled and will be complete before unit 2 fuel load.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
