Region II
Attention: Dr. J. Nelson Grace, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30323

Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNIT 2 - OFFICE OF INSPECTION AND ENFORCEMENT - BULLETIN 80-20 - FAILURES OF WESTINGHOUSE TYPE W-2 SPRING RETURN TO NEUTRAL CONTROL SWITCHES - SUPPLEMENTAL INFORMATION

The subject bulletin was transmitted to TVA by letter dated July 31, 1980. TVA submitted responses on September 16 and December 12, 1980; April 2, August 12, and November 9, 1981; June 2, 1982; March 30, 1983; and September 16, 1985.

As discussed with NRC-OIE Region II Inspector Bob Carroll on April 14, 1986, the date of January 9, 1986 previously set for completion of corrective actions for unit 2 was not met. Due to a change of scheduling to meet other priorities, rework on unit 2 handswitches has been rescheduled. The corrective action on this matter will be completed by unit 2 fuel load.

This item was closed in Inspection Report Nos. 50-390/83-46, 50-391/83-35.

If there are any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

R. L. Gridley
Manager of Licensing
