ATTN: James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR, BELLEFONTE, HARTSVILLE, PHIPPS BEND, AND YELLOW CREEK NUCLEAR PLANTS - REPORTABLE DEFICIENCY - REGIONAL QUALITY ENGINEERING BRANCH INSPECTION OFFICE MANPOWER - WBRD-50-390/82-17, -391/82-16 - BLRD-50-438/82-12, -439/82-12 - HTRD-50-518/82-07, -519/82-06, -520/82-07, -521/82-06 - PBRD-50-553/82-06, -554/82-06 - YCRD-50-566/82-06, -567/82-06

The subject deficiency was initially reported to NRC-OIE, Region II, Inspector Don Quick on January 20, 1982 as NCR M80-11 Deficiency No. 3. Our first interim report was submitted on March 1, 1982. In compliance with paragraph 50.55(e) of 10 CFR Part 50, this letter constitutes our second interim report on the subject deficiency. An analysis was made of additional training which would benefit the employees in the Regional Field Offices. The quality assurance training was completed on March 18, 1982. Technical training has been and will continue to be administered on an ongoing basis. Since the Quality Engineering Branch's workload has decreased because of the deferments of the Hartsville, Phipps Bend, and Yellow Creek Nuclear Plants, the Regional Field Offices now have sufficient manpower. To adequately forecast future manpower needs, an administrative instruction, QEB-A1 104, was prepared and implemented in January 1982. Since that time, the instruction has been and will be used to estimate and authorize manpower requirements for each contract assignment. As discussed with

Mr. James P. O'Reilly June 3, 1982

NRC-OIE Inspector Ross Butcher on May 24, 1982, an eight-day extension was granted on the submittal of this report. TVA anticipates transmitting the next report on or before September 16, 1982. If you have any questions, please call Jim Domer for BWRs at FTS 858-2725 or Ralph Shell for PWRs at FTS 858-2676.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
