Subject: Colloid Report

Britt, NUREG-1564 (ML073100056) offers bases for colloid issue. After this report there are not much new information available. Therefore, I am relying on this report in my LA review - especially in mass balance/loading and coupling with waste form degradation. I presented a summary of the issues under normal, seismic and igneous intrusive conditions in the last ENG 4 internal meeting on 6/4. I don't think the colloid issue is new. I have worked on it for over a decade. The Hakan's work summarizes the related DOE's AMRs, supplementing my work. Tae
