Re: Response to Apparent Violations, IA-08-026

Im writing this letter to explain my actions per your finding for the incident which occured on 1-20-2007. In my twenty plus years as a radiographer this the first situation where my lack of focus and concentration has led to me using bad judgement, in turn potentially causing harm to myself or others. I cannot defend my actions because I went against the safety rules & guidelines of my company and the NRC. The reasons for me choosing my actions were panic and fear (for my career).

Due to my actions on the date of 1-20-07, I have decided to resign my ability to perform as a radiographer permanently. My IRRSP card expired on 7/07, and I have not/will not renew certification.

Having time to think about my actions for over a year now I am very sorry, and apologize deeply to Mistras (Conam) and to the NRC. The overexposure was completly accidental as I have stated since day one; however my neglect for safety guidelines is what caused it.

Sincerly,

David Green
