Subject: FW: Bellefonte RCOL - Letter Dated 08/29/2008 Attachment 02.03.04-03A

Phil,

Below is an explanation of the problem that Leta is having with opening a computer input file. Please let me know when you can support a call.

>>>>>>>explanation of problem with opening computer input files from Leta Brown>>>>>>>>>>>>

In checking further, it appears that my question may apply only to the 33 files in Attachment 02.03.04-03A of the 08/29/2008 Bellefonte letter. This attachment is a compact disk of ARCON96 computer code input and output files. While I am able to access the information using standard NRC-available software, it appears that there are no internal "line breaks" in the information fields. Thus, with the techniques that I am using, the information wraps continuously which makes it difficult to read and ARCON96 does not run properly when I try to make a comparison calculation. Therefore, I would like to talk with Bellefonte (e.g., TVA) to understand how I should open the files so I can more efficiently utilize the information.
