Windsor, CT 06095

SUBJECT: REVIEW ACTIVITIES FOR THE INTERNATIONAL REACTOR INNOVATIVE AND SECURE DURING FISCAL YEAR 2009

Dear Dr. Kling:

The purpose of this letter is to inform you of decisions by the U.S. Nuclear Regulatory Commission (NRC) regarding review activities for advanced reactor designs during fiscal year (FY) 2009. On July 17, 2008, the NRC released a memo from the staff to the Commission dated July 3, 2008 detailing the criteria for including future small, grid-appropriate reactor licensing activities in future budgets of the NRC (ADAMS Accession No. ML0819800440, enclosed).

With the exception of review of the Next Generation Nuclear Plant, the staff's current plans for FYs 2009 and 2010 are to limit interactions with the designers of grid-appropriate reactors to occasional meetings or other nonresource-intensive activities. As such, any current or requested work on the International Reactor Innovative and Secure that goes beyond these limitations will be placed on hold. If you have any questions regarding this matter, please contact Mr. George F. Dick at (301) 415-3019 or Mr. Thomas J. Kenyon at (301) 415-1120.

Sincerely,

/RA/

Edward T. Baker, Director
Advanced Reactor Project
Office of New Reactors

Project No.: 726
