Subject: Rethink the future of Uranium Recovery GEIS

Dear Mr. Park,
I beleive it is in the best interest of all Americans to have a better plan in the works, then the one fits all. We have been witnessing how poor stuardship by the bush adminastration has devistated our ecology and we as a people can no longer abide halfass efforts on the behalf of the citizens. I have read over the plans that were sent to me reguarding existing bomb sites and find that it is a one size fits all concept with slight variations is not acceptable there or in your actions.
The NRC needs to follow the National Environmental Protection Act (NEPA) and conduct individual environmental impact statements for all proposed in situ uranium mines. The people of the potentially impacted areas and communities deserve the respect and individual attention the NRC should be giving when considering something as potentially dangerous as an in situ uranium mine.

There is no one size fits all approach to uranium mining across the country and the NRC should be conducting individual assessments of the areas to make sure the environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to devastating impacts on the environment, ecosystems and communities in the area.

Thank you,

Ham & Kirsten Lyslo-Mora
