RESPONSE TO NRC ADMINISTRATIVE LETTER (AL) 99-02, "OPERATING LICENSING ACTION ESTIMATES"

This letter provides TVA's response to the subject AL dated June 3, 1999. TVA estimates the number of licensing actions for Fiscal Year (FY) 2000 for each of our operating plants as follows:

Browns Ferry Nuclear Plant (BFN) - 13 (thirteen) licensing actions
(One would classify as a complex review in the context used in the AL.)

Sequoyah Nuclear Plant (SQN) - 23 (twenty-three) licensing actions
(None classify as a complex review in the context used in the AL.)

Watts Bar Nuclear Plant (WBN) - 12 (twelve) licensing actions
(Only one, the leading edge flow monitoring technical specification change, will classify as a complex review in the context used in the AL.)

For FY 2001, we anticipate a similar number of licensing actions for each plant. Only tritium production technical specification changes for WBN and SQN will classify as complex reviews in the actions planned for those plants.
