Subject: Uranium Recovery GEIS

Dear Mr. Park,

I am writing you today to ask that the you direct the NRC to follow the National Environmental Policy Act (NEPA) and conduct individual environmental impact statements for each and every proposed in situ uranium mine. The people and communities of the potentially affected areas and deserve the respect and individual attention the NRC can give when considering something as potentially dangerous and hazardous to human and animal health as an in situ uranium mine.

There is no one size fits all approach to uranium mining across the country and the NRC should be conducting individual assessments of the areas to make sure the environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to devastating impacts on the environment, ecosystems and communities in the area.

Thank you,

James B Sitrick Jr
