Subject: Uranium Recovery GEIS

Dear Mr. Park,

NRC needs to follow the National Environmental Policy Act (NEPA) and conduct individual environmental impact statements for all proposed in situ uranium mines. Each area has its own unique problems and the people who reside in these areas need to heard regarding their concerns.

A one fits all policy for a study could lead to an environmental disaster to the people of the region, their water, their environmental and the eco system. There will children, the elderly and the disabled who will feel acutely any mistakes made. Please conduct individual studies so that lives and our environment does pay the price.

Thank you for your time.

Anne Wolf
