Subject: Uranium Recovery GEIS

Dear Mr. Park,

I am writing to you to ask that the NRC follow the National Environmental Policy Act (NEPA) and conduct individual environmental impact statements for all proposed in situ uranium mines. The people of the potentially impacted areas and communities require the individual attention the NRC should be giving when considering something as potentially dangerous as an in situ uranium mine.

The NRC should be conducting individual assessments of the areas to make sure environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to negative impacts on the environment, ecosystems and communities in the area.

Thank you,

Robert Linger
