SUBJECT

Control No. 317486 - Re - Amendment request by letter dated August 22, 2008, regarding the request to replace two of their existing fixed gauges, both TN Model 5034, Cs-137, 200 mCi each with Berthold Model LB 300 L, Cs-137, 16 mCi each.

SUMMARY

In a telephone conversation with Mr. Kubiskey on this date we discussed the need to increase the current possession limit on the license by 32 mCi since the sources to be replaced will be on site at the time of arrival of the new sources and that we will add the new make and model of gauges to the license at this time. Further, I noted that they can amend the license after removal and transfer of the replaced gauges, if they so wish, to delete make and model number of gauges no longer possessed and to reduce possession limits if they so wish.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).
