Subject: RE: List of codes

Don,
I have my branch meeting tomorrow at 2 pm so I can't make the conference call. Hopefully I can contact Chryl Antonio today and let her know my needs.
Steve

Steve,

Thanks, I'll include those on my list. Can you also pass on the name and company of the person you have been dealing with this issue from the Bellefonte and Lee site audits? I'll see if he is also supporting Progress Energy.

I will send out a meeting announcement later today (hopefully this morning). It will be at Butch Burton's office at 2 PM tomorrow.

Thanks,
Don

Subject: RE: List of codes

Don,
We use the LADTAPII and GASPARII codes. In addition to reviewing the calculational workbooks, we ask for the input and output data files for these codes to take with us from the audit. Have you set a time and place for the conference call with the applicant and PNNL to discuss our audit needs?
Steve

Subject: List of codes

Steve,

Can you give me a list Tuesday morning of the code packages like MACCS2 that you will need to see the calculational workbooks for during the site audit?

Thanks in advance,
Don
