Attachment A: Photos of Dry-Cooled 1,650 MW Midlothian Energy and 4,000 MW Matimba

Photo 1: 1,650 MW Midlothian Energy Limited Partnership, Midlothian, Texas. Air-cooled condensers (6 sets of 15 cells each) on right, gas turbine combined-cycle units (6 total) on left.

Photo 2: 4,000 MW Matimba dry-cooled coal-fired power plant in South Africa. Plant consists of six 665 MW units. The air-cooled condensers are in the foreground of the power plant.
