Sylvania Electric Products, Inc.
Hicksville, New York

Attention: Mr. Grant W. LaPier
Plant Manager, Commercial Operation

Gentlemen:

Reference is made to your letter dated January 1, 1961, which advises that on that date Sylvania-Corning Nuclear Corporation became a Division of Sylvania Electric Products, Inc.

Since Sylcor will operate as a division of Sylvania, it will be necessary that those special nuclear material (10 CFR Part 70) licenses previously issued to Sylvania-Corning Nuclear Corporation be amended to reflect the corporate change. In this regard, financial information indicating the ability of Sylvania Electric Products, Inc., to carry out the activities for which a license is to be considered, and to accept responsibility for materials distributed to it must be submitted. Four copies of current financial statements should be submitted.

In the event Sylvania Electric Products, Inc., requires a license or licenses to receive source materials, an application should be submitted pursuant to 10 CFR Part 40, copy enclosed. The application should be in letter form in triplicate, indicating the quantity and type of material that will be received, a detailed description of the use of the material, and the procedures for assuring compliance with 10 CFR 20, copy enclosed.

Very truly yours,

J. C. Delaney
Chief, Nuclear Materials Branch
Division of Licensing and Regulation

Enclosures:
10 CFR 20, 40, and 70
