Re: Demand for Information and Reporting Damaged Devices Containing Radioactive Material

Ms McIntosh:

This letter is in follow up to your extension granted for our response in regards to our Focused Service owned and managed hotels operating under the Hilton Garden Inn, Homewood Suites, Hampton Inn, and Hampton Inn and Suites Brands.

A. We have provided NRC requirements and guidelines to all owned/managed focused service hotels operating under the Brands referenced above and have posted such requirements and guidelines on our internal intranet site for easy access and ongoing reference for our hotels.

   The attached report contains current contact information for the persons responsible for ongoing monitoring at the 3 sites that have Tritium signage.

B. We can account for a total of 80 out of the assumed/identified original number of 80 of these signs.

C. There is no disparity between the current versus the original number of signs.

D. We have sent documentation to all owned/managed focused service properties operated under the brands noted above and have received responses from all of these hotels for a total of 67 inquiries/responses. Only 3 hotels reported that they had Tritium signs installed. The number of such signs reported is 80.

E. We have instructed these hotels to immediately communicate to the Hilton corporate office (to the attention of the Vice President Engineering) any change in number of existing (new, disposed of, or missing) signs. We have also instructed these hotels to immediately notify us in the event that such signs are damaged and require replacement and to also notify your agency or the
