NEVADA RESPONSE TO IMPEP QUESTIONNAIRE
(Information provided during onsite review 6/1/09)

Table of Contents:

Open license cases, with date from original request and dates of follow up actions	TAB 1
Licenses Terminated within the review period	TAB 2
Current Log or other document used to track licensing actions	TAB 3
All licensing actions completed during review period	TAB 4
Current Log or other document used to track inspections	TAB 5
Inspections completed during review period	TAB 6
Inspection Frequencies by license type	TAB 7
Allegations occurring during the review period	TAB 8
Standard license conditions	TAB 9
Technical procedures for licensing, model licenses, Review guides	TAB 10
Inspection procedures and guides	TAB 12

TAB 1

OPEN LICENSE CASES, WITH DATES FROM ORGINAL REQUEST AND DATES OF FOLLOWUP ACTIONS

ALLEGATIONS OCCURING DURING THE REVIEW PERIOD
(NON-PUBLIC DOCUMENT)

TAB 9

STANDARD LICENSE CONDITIONS

TAB B2

Radioactive Material License
Standard Conditions

PLACE OF USE

1) Radioactive material shall be used only at _____.
2) Radioactive material may be at _____ and at temporary job sites of the licensee anywhere in the State of Nevada where the Division of Health maintains jurisdiction for regulating the use of radioactive material.
3) Radioactive material may be stores at _____ and may be used at temporary job sites of the licensee anywhere in the State of Nevada where the Division of Health maintains jurisdiction for regulating the use of radioactive material.
4) Radioactive material shall be used only at temporary job sites of the licensee anywhere in the State of Nevada where the Division of Health maintains jurisdiction for regulating the use of radioactive material.

SUPERVISION-GENERAL

5) Radioactive material shall be used by _____.
6) Radioactive material shall be used by, or under the supervision of,

   _____.
7) Radioactive material shall be used by, or under the supervision and in the physical presence of, _____.
8) Gauges containing radioactive materials shall be used only by persons who have successfully completed the manufacture's training course or an equivalent training course that has been evaluated and approved by the U.S. Nuclear Regulatory Commission or an Agreement State. The licensee shall review a user's credentials prior to authorization for the use of radioactive materials under the license, maintain a list of individuals he has designated as users and maintain all applicable training records.

SUPERVISION-SPECIAL MEDICAL

Condition 9. May be used on broad medical licenses or on specific licenses of limited scope when licensees are permitted to select their own users.

9) Physicians designated to use radioactive material in or on humans shall meet the training criteria established in Subpart J of the Nevada Policy Document for Medical Use of Radioactive Materials dated January, 1989.

Condition 10. is for use on a teletherapy license when licensee is permitted to select its own users.

10) Radioactive material shall be used by, or under the supervision of, physicians (defined in Section 459.064 of the Nevada Administrative Code) who are certified by the American Board of Radiology in Radiology or Therapeutic Radiology and who have been approved by:

Condition 11. may be used if a proposed physician-user has no training and experience or a proposed physician-user with limited training and experience want to perform a few procedures (In-vitro/ In vivo studies) and does not wish to file Form NRC-482 or Form NRC- 483.

11) Radioactive materials of the types, quantities, and forms specified in Section 459.226 (1) and Section 459.228 of the Nevada Administrative Code to be used in accordance with the provisions of Sections 459.226(1), 459.226 (3), 459.228, 459.230(2), and 459.230 (3) of the Nevada Administrative Code.

SUPERVISION-NUCLEAR PHARMACY

12) At least one individual named in Condition _____ shall be physically present at the authorized place of use whenever radioactive material is being used.

SUPERVISION-BROAD LICENSE

13) Radioactive material shall be used by , or under the supervision of, individuals designated by _____.

SUPERVISION-PORTABLE GAUGING DEVICES

14) Radioactive materials shall be used by, or under the supervision and in the physical presence of, _____ or individuals who have been trained as specified in application dated _____. The license shall maintain records of individuals designated as users.

LEAK TESTS

The following Conditions 15. through 19. apply to leak testing of sources except for civil defense, radiology, teletherapy broad licensees, source fabricators and some panoramic irradiators.

For licenses in which all sources need to be leaked tested at 6 month or 12 month intervals, use the following as the A. section of the condition.

15)

A. (1). The sources specified in Item(s) 7._____shall be tested for leakage and/or contamination at intervals not to exceed 6 months. Any source received from another person which is not accompanied by a certificate indicating that a test be performed within 6 months before the transfer shall not be put into use until tested.

A. (2). Notwithstanding the periodic leak test required by this condition, any licensed sealed source is except from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.

For the licenses in which all sources need to be tested at 3 year intervals, use the following as the A. section of the condition.

16)

A. (1) The source(s) specified in Item(s) 7._____ shall be tested for leakage and/or contamination at intervals not to exceed 3 years. Any source received from another person which is not accompanied by a certificate indication that a test was performed within 6 months before the transfer shall not be put into use until tested.

A. (2) Notwithstanding the periodic leak test required by this condition, any licensed sealed sourced is exempt from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.

For licenses in which there is a mixture of six month, twelve month, and three year intervals, use the following as A. section of the condition.

17)

A. (1) The source(s) specified in Item(s) 7._____shall be tested for leakage and/or contamination at intervals not to exceed 6 months and the source(s) specified in Item(s) 7._____ shall be tested for leakage and/or contamination at intervals not to

exceed 3 years. Any source received from another person which is not accompanied by a certificate indication that a test was performed with in 6 months before the transfer shall not be put into use until tested.

A. (2) Notwithstanding the periodic leak test required by this condition, any licensed sealed source is exempt from suck a leak test when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.

For those licenses which provide for possession of fixed gauges which are not specified by model numbers and are manufactured by Kay Ray, Accuray, Ohmart, LFE, or Texas Nuclear, use the following as the A. section of the condition.

18)

A. Sources contained in devices manufactured by _____shall be tested for leakage and/or contamination at intervals not to exceed 6 months. The test may be conducted at 3 year intervals provided the sources have been authorized by the Division, the NRC or another Agreement State for a three year leak test interval. Any source which is received from another person which is not accompanied by a certificate indicating that a test was performed within 6 months before the transfer shall not be put into use until tested.

B. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie or more removable contamination, the source shall be removed from service and decontaminated, repaired, or disposed of in accordance with Division regulations. A report shall be filed within 5 days of the date the leak test result is known with the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada 89706. The report shall specify the source involved, the test results, and corrective action taken. Records of leak test results shall be kept in units of microcuries and shall be maintained for inspection by the Division.

C. Tests for leakage and/or contamination shall be performed by the licensee or by other person specifically licensed by the Division, the NRC or an Agreement State to perform such services.

OR

D. The license is authorized to collect leak test samples for analysis by _____ or test for leakage an/or contamination shall be performed by persons specifically licensed by the Division, the NRC or an Agreement State to perform such services.

For broad licenses and for licenses which authorize fabrication of sources use the following condition.

19)

A. (1) Each sealed source acquired form another person and containing radioactive material, other than hydrogen 3 with a half-life greater than 30 days and in any form other than gas shall be tested for contamination and/or leakage before use. In the absence of a certificate from a transferor indicating that a test has been made within 6 months before the transfer, a sealed source received from another person shall not be put into use until tested.

A. (2) Notwithstanding the periodic leak test required by this condition, any licensed sealed source is exempt from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting materials or 10 microcuries or less of alpha emitting material.

A. (3) Except for alpha sources, the periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources excepted from this test shall be tested for leakage before any use or transfer to another person unless they have been leak tested within 6 months before the date of use or transfer.

B. Each sealed source fabricated by the licensee shall be inspected and tested for construction defeats, leakage and contamination prior to use or transfer as a sealed source. If the inspection or test reveals any construction defects or 0.005 microcurie or greater of contamination, the source shall not be used or transferred as a sealed sourced until it has been repaired, decontaminated and retested.

C. Each sealed source containing radioactive material, other than hydrogen 3, with a half-life greater than 30 days and in an any form other than gas shall be tested for leakage and/or contamination at intervals not to exceed 6 months except that each source designed for the purpose of emitting alpha particles shall be tested at intervals not to exceed 3 months.

D. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source or from the surfaces of the device in which the sealed source is permanently or semi-permanently mounted or stored on which one might except contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Division.

E. If the test reveals required by Subsection A. or C. of this condition reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Division regulations. A report shall be filed within 5 days of the date the leak test result is known with the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706 describing the equipment involved, the rest results, and the corrective action taken.

GAS CHROMATOGRAPHS

The following Condition 20. is for the use in licenses which include gas chromatographs containing Nickel-63.

20) In lieu of using the conventional radiation caution colors (magenta or purple on yellow background) as provided in Section 459.340(1) of the label detector cells and cells baths, containing radioactive material and used in gas chromatography devices, with conspicuously etched or stamped radiation caution symbols without color requirement.

21) Detector cells containing radioactive material shall not be opened or the sources removed from the detector cell by the licensee.

22) Detector cells containing titanium tritide foil shall only be used in conjunction with a properly operating temperature control mechanism which prevents foil temperatures from exceeding 225 degrees Centigrade.

23) Detector cells containing scandium foil shall only be used in conjunction with a properly operating temperature control mechanism which prevents foil temperatures from exceeding 325 degrees Centigrade.

24) Each Ni-63 source must only be used in gas chromatography devices which have been approved for that source by the U.S. Nuclear Regulatory Commission or Agreement State. The licensee shall maintain for inspection by the Division the necessary documentation which demonstrates the Ni-63 source is approved for the device in which it is being used. The documentation may be technical literature from the manufacturer describing the device or other equivalent documentation.

CIVIL DEFENSE

25) Each sealed source containing radioactive material to be used outside of a shielded exposure device shall have a durable, legible, and visible tag permanently attached by a durable ring. The tag shall be at least 1 inch square, shall bear a conventional radiation symbol prescribed in Section 459.340(1) of the Nevada Administrative Code and a minimum of the following instructions: DANGER-RADIOACTIVE MATERIAL- DO NOT HANDLE- NOTIFY CIVIL AUTHORITIES IF FOUND.

Replace of tags and rings shall be carried out by the licensee in accordance with instructions contained in procedures provided by the Federal Emergency Management Agency.

26)

A. Radioactive material contained in DCPA Sealed Source Sets shall be tested for external leakage and/or contamination upon receipt from another person, except when the licensee receives certification from the person that the sources had been tested within 6 months before transfer and found free of surface contamination. Thereafter, sources shall be tested for leakage and/or contamination at intervals not to exceed 6 months. Records of leak tests shall be maintained by the licensee shall be kept in units of microcuries.

B. The test for leakage and/or contamination shall be capable of detecting the presence of 0.005 microcurie of radioactive material or the test sample. If the test reveals any radioactive material, the licensee shall take immediate action to prevent spread of contamination and within five (5) days after the date the leak test result is known shall notify the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706.

C. Leak Tests of sealed sources in DCPA Sealed Source Sets shall be performed by the licensee in accordance with instructions contained in procedures provided by the Federal Emergency Management Agency.

INDUSTRIAL RADIOGRAPHY

27). The individual listed below are the only persons authorized by this license to act as radiographers or radiographers' assistants as defined in Section 459.692 and 459.694 of the Nevada Administrative Code:

RADIOGRAPHERS & RADIOGRAPHERS' ASSISTANTS

(For use if Radiographers and Radiographers' Assistants are specifically named on the licensee does not have an approved training program.)

28)

A. Notwithstanding the periodic leak test required by Section 459.714 (2) of the Nevada Administrative Code, such requirement does not apply to radiography sources that are stored and not being used. The sources excepted from this test shall be tested for leakage before use or transfer to another person.

B. Sealed sourced authorized for a use other than radiography shall be tested as radiography sources in accordance with Section 459.714 of the Nevada Administrative Code.
(B. should be used only if the license provides for use of sources other than radiography sources, e.g., a source contained in an instrument calibrator.)

29) The license is authorized to receive, possess and use sealed sources of iridium-192 or Cobalt-60 where the radioactivity exceeds the maximum amount of radioactivity specified in this license provided:

A. Such possession does not exceed the quantity per source specified in Item 8 by more than 20% for Iridium-192 or 10% for Cobalt-60;

B. Records of the licensee show that no more than the maximum amount of radioactivity per source specified in this license was ordered from the supplier or transferor of the byproduct material; and

C. The levels of radiation for radiographic exposure devices and storage. Containers do not exceed those specified in Section 459.706 of the Nevada Administrative Code.

(If a license provides only Iridium-192, delete Cobalt-60.)

30) The licensee is authorized to possess, use, transfer, and import up to 999 kilograms of uranium contained as shielding material in the radiology exposure devices and source changers authorized by this license.

WELL LOGGING

31) Each source holder and logging tool containing radioactive material shall bear a legible and visible marking. The marking shall bear the conventional radiation symbol and the following wording: IF FOUND-DANGER-RADIOACTIVE-DO NOT HANDLE-NOTIFY CIVIL AUTHORITIES.

FIXED GAUGES

32) Installation, initial radiation survey, relocation, removal, from service, maintenance, and repair of devices containing sealed sources and installation, replacement and disposal of sealed sources shall be performed only by persons specifically licensed by the Division, the NRC or an Agreement State to perform such services.

33) Installation, initial radiation survey, relocation, or removal from service of devices containing sealed sources shall be performed by _____or by persons specifically licensed by the Division, the NRC or an Agreement State to perform such services. Maintenance and repair of devices installation, replacement, and disposal of sealed sources shall be performed only by person specifically licensed by the Division, The NRC or an Agreement State to perform such services.

34) Installation, initial radiation survey, relocation, removal from service, maintenance, and repair of devices containing sealed sources shall be performed by _____ or by persons specifically licensed by the Division. The NRC or an Agreement State to perform such services. Installation, replacement, and disposal of sealed sources shall be performed only by persons specifically licensed by the Division, the NRC or an Agreement State to perform such services.

NUCLEAR PHARMACIES

35)

A. Radiopharmaceuticals dispensed and/or distributed for human use shall be either:

(i) Repacked from prepared radiopharmaceuticals that are the subject of an FDA-approved "New Drug Application" (NDA) or for which FDA has accepted a "Noticed of Claimed Investigational Exemption for a New Drug" (IND), or

(ii) Prepared from generators and reagent kits that are the subject of an FDA-approved NDA or for which FDA has accepted an IND.

B. Prepared radiopharmaceuticals for which FDA has accepted an IND and radiopharmaceuticals prepared from generators or reagent kits for which FDA has accepted an IND shall be dispensed an/or distributed:

(i) In accordance with the directions provided by the sponsor of the IND, and

(ii) Only to physicians who have been accepted by the sponsor of the IND to participate in clinical evaluation of the drug.

The licensee shall inform in writing each physician who participates in an IND evaluation that the physician is responsible to the sponsor of the IND for use of the drug in accordance with protocols established by the sponsor and for reporting to the sponsor the clinical information obtained through use of the drug.

36) The licensee shall elute generators and process radioactive material with regent kits in accordance with instructions furnished by the manufacturer on the label attached to or in the leaflet or brochure that accompanies the generator or reagent kit.

37) Reagent kits may be redistributed to persons licensed pursuant to Sections 459.244 and 459.248 of the Nevada Administrative Code or under equivalent licenses of Agreement States, for Group III.

38) Radioactive waster may be picked up from the licensee's customers and disposed of in accordance with the procedures, statements, and representations in

_____.

TELETHERAPY

39) The following shall be performed only by persons specifically licensed by the Division, the NRC or an Agreement State to perform such services:

A. Installation, relocation, or removal of teletherapy units containing sources.

B. Source exchange

C. Any maintenance or repair operations on a teletherapy unit involving work on the source drawer, the shutter or other mechanism that could expose the source, reduce the shielding around the source or compromise the safety of the unit and result in increased radiation levels.

40)

A. Teletherapy sources shall be tested for leakage at intervals not to exceed 6 months. Records of test results shall be kept in units of microcuries and maintained for inspection by the Division. In the absence of a certificate form a transferor indicating that a test has been made within 6 months before the transferor indicating that a test has been made within 6 months before the transfer, a source received from another person shall not be used until tested for leakage.

B. The test shall be sufficiently sensitive to detect 0.005 microcurie of contamination on the test sample.

C. The test sample shall be taken from selected accessible surfaces of the teletherapy head. The selected accessible surfaces should be those surfaces on which one might expect contamination (if there were to be leakage) to accumulate and shall include the inner surface of the most frequently used treatment cones or beam collimating device. The test sample shall be taken with the source in the "off" position.

D. If the test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the source from use and take action to prevent spread of contamination. A report shall be filed within 5 days of the date the leak test result is known with the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706. The report shall specify the source involved, the test results, and corrective action taken.

41) The licensee is authorized to possess, use, transfer, and import up to 999 kilograms of uranium contained as shielding material in the teletherapy units authorized by this license.

42) Before initiation of a treatment program, each teletherapy unit shall be equipped with electrical or mechanical stops limiting use of the primary beam of radiations so as to ensure compliance with Section 459.326(2) of the Nevada Administrative Code as evidenced by a radiation survey. Necessary use restrictions shall be fully described in radiation survey reports submitted in accordance with Condition _____ of this license.

43) A set of written emergency instructions shall be posted at the teletherapy machine control. These instructions shall inform the machine operator of the procedure to be followed should he be unable to turn the machine's primary beam of radiation "off" with the controls outside the treatment room.

44)

A. Access to the teletherapy room shall be controlled by a door at each entrance. Such doors shall be normally closed.

B. Each entrance to the teletherapy room shall be equipped with an electrical interlock system that will turn the teletherapy machine's primary beam of radiation "off" immediately upon entering opening of any entrance door. The interlock system shall be connected in such a manner that the teletherapy machine's primary beam of radiation cannot be turned "on" until all treatment room entrance doors are closed and the beam "on-off" control is reset at the control panel.

C. Electrical interlocks on entrance doors to the telepathy room shall be tested for proper operation at least once every 6 months. Records of test results shall be maintained for inspection by the Division. Records may be disposed of following Division inspection.

D. In the event of malfunction of any door interlock, the telepathy machine control shall be locked in the "off" condition and not used, except as may be necessary for repair or replacement of the interlock system, until the interlock system is shown to be functioning properly.

45) Before initiation of a treatment program, and subsequent to each installations of a teletherapy source, radiation surveys and tests shall be performed in accordance with the following:

A. A radiation survey shall be made of:

(i) The teletherapy source housing, with the teletherapy source in the "off" position. The maximum and average radiation levels at 1 meter from the teletherapy source in the "off"

position shall not exceed 10 milliroentgens per hour and 2 milliroentgens per hour, respectively.

(ii) All areas adjacent to the treatment room with the teletherapy source in the "on" position. The survey, except Item (c) shall be performed with a phantom in the primary beam of radiation and shall clearly establish:

a. That radiation level in restricted areas are not likely to cause personnel exposure in excess of the limits specified in Section 459.322 of the Nevada Administrative Code.

b. That quantities of radiation in unrestricted areas do not exceed the limits specified in Section 459.326 (2) of the Nevada Administrative Code.

c. The intensity of the primary beam of radiation at a specified distance from the teletherapy source.

B. Tests shall be made to determine proper operation of:

(i) Electrical interlocks on entrance doors to the teletherapy treatment room.

(ii) The teletherapy source "on-off" indicator, both at the source housing and on the teletherapy machine control panel.

(iii) Electrical or mechanical stops installed for the purpose of limiting use of the primary beam of radiation (restriction of source housing angulation or elevation, carriage or stand travel and operation of the beam "on-off" mechanism).

(iv) The teletherapy treatment timing device.

C. A report of the results of the above surveys and tests shall be sent to the radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706 not more than 30 days after each installation of a teletherapy source.

46)

A. Any changes made in the treatment room shielding, location of the unit within the treatment room, or use of the teletherapy unit that could result in increased radiation levels in areas outside the teletherapy treatment room shall be evaluated by a radiation survey made in accordance with Condition _____, and reported to the Division with in 30 days following the completion of the change(s).

B. Relocation of the teletherapy unit to a new facility is not permitted without prior approval of the plans and details by the Division. Following such approval and relocation, a radiation survey shall be made in accordance with Condition _____, and reported to the Division within 30 days after completion of the move.

47)

A. Notwithstanding other authorizations and requirements of this license, the licensee shall have the Cobalt-60 source described in Subitem 7 _____ of this license removed from the teletherapy head and returned to the supplier if the radiation levels permitted by Condition _____ are exceeded.

B. In addition, the Cobalt-60 teletherapy source described in Subitem 7_____ shall be locked in place and not places into service until the items in Condition _____ are satisfied.

48) Notwithstanding the requirements of Section 459.391(1) of the Nevada Administrative Code, the licensee is authorized to extend until _____ the time interval for inspection and servicing of its teletherapy unit.

49) Notwithstanding the requirements of Section 459.388 of the Nevada Administrative Code Part 35, _____ may perform the duties of the qualified expert for those full-calibration and spot-check measurements specified in Sections 459.385 and 459.386 of the Nevada Administrative Code.

CARDIAC PACEMAKERS

50) The specified possession limit includes all licensed material possessed by the licensee under this license whether in storage, implanted in patients, or otherwise in use.

51) The licensee shall report to the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706 with in 24 hours of occurrence, the death of any nuclear pacemaker patient, and any adverse reaction and/or malfunction involving a pacemaker system, including the leads. A written report giving details of the adverse reaction and/or malfunction shall be submitted within 30 days.

52) The licensee shall report to the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706, within 10 days of loss of contract with a nuclear pacemaker patient.

53) The licensee shall continue patient follow-up and replacement procedures for the nuclear pacemaker during the life of the patient. Procedures for recovery and authorized disposal of the nuclear pacemaker by return to the manufacturer shall be followed upon the death of the patient.

MEDICAL BRACHYTHERAPY LICENSE CONDITIONS

54)

A. The licensee shall verbally report to the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706; telephone: (702)687-5394 within 24 hours when possible of the death of any brachytherapy patient where radiation sources have been permanently implanted but have not decayed to exempt quantities specified in NAC 459.188.

   A written report of the patient's death shall be submitted to the Radiological Health Section, Nevada State Health Division within 30 days of the patient's death. The written report shall include patient's name, quantity of radioactivity administered, quantity of radioactivity administered, quantity of radioactivity at the time of death and intended disposition.

B. The licensee shall report in writing to the Radiological Health Section, Nevada Health Division, 4150 Technology Way, Carson City, Nevada, 89706, within 10 days when possible of the loss of contact with a brachytherapy sources that have not decayed to exempt quantities specified in NAC 459.188. The report shall include the patient's name, quantity of radioactivity administered, date of last contact, calculated radioactivity at the time of last contact.

C. The licensee shall instruct brachytherapy patients who receive implanted radiation sourced of proper radiation safety procedures including activities that may be conducted which impact brachytherapy source radiation safety.

D. The licensee shall continue patient follow-up and appropriate radiation safety procedures for ten (10) radioactive half lives while the patient is under the licensee's medical care. These follow-up activities shall be conducted until such time that permanently implanted brachytherapy sourced have decayed to exempt quantities specified in NAC 459.188 requiring no further consideration for radiation safety requirements by the patient or patient's family.

E. Written procedures for recovery and disposal of implanted brachytherapy sourced shall be maintained by the licensee. Implementation of the procedures will be negotiated between the licensee and the Division in the event of patient death where body cremation is anticipated prior to removal or decay of the implanted radioactive sources to exempt quantities specified in NAC 459.188.

Condition 55 should be used only if the license does not provide for use under Section 459.253 of the Nevada Administrative Code.

55. Needles or standard medical applicator cells containing Cobalt 60 as wire shall not be opened by the licensee.

MOBILE NUCLEAR MEDICINE SERVICE LICENSES

Condition 56 should be placed on all mobile service licenses.

56. Upon the issuance by the Nevada State Health Division of a specific license to any institution specified in Condition____, the licensee shall cease use of radioactive material on the premises of the institution.

GAMMA IRRADIATORS

For wet source-storage irradiators which have an ion exchange system for water clean-up, the following leak test condition is acceptable.

57) The ion exchange resin filter bed shall be monitored as specified in application dated _____. If any radioactivity above normal background is detected, the licensee shall determine is the radioactivity is due to a leaking source. Any source found to be leaking shall be removed from service. A report of a leaking source shall be made within 5 days of the date the leak test result is known to the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706.

The following condition should be used only for panoramic irradiators. It should not be used for self-contained irradiators.

58. Before initiation of irradiator operations or after reloading of sources in the irradiator and before restart of the irradiator, a radiation survey shall be conducted to determine radiation

levels around, above, and below the irradiator with sources in the shielded position and in the exposed position. The results of the survey shall be sent to the Radiological Health Section, Nevada State Health Division, 4150 Technology Way, Carson City, Nevada, 89706 more than 30 days after the survey is conducted.

The following condition is appropriate for self-contained irradiators.

59. The licensee shall not perform repairs or alterations of the irradiator involving removal of shielding or access to the radioactive material. Removal, replacement, and disposal of sealed sourced in the irradiator shall be performed by a person specifically licensed by the Division, the NRC or an agreement State to perform such services.

MINERAL ANALYSIS PROBE DEVICES

60. The licensee shall maintain a utilization log for each source at the storage location stated in the application of this license. The utilization log shall include, but not be limited to, make, model, number, and a serial number or a description of each source of radiation used, dates of use, location of use and the name of the authorized individual using the source.
61. A physical radiation survey shall be made to determine that the sealed source has returned to the shielded position. Such radiation surveys shall be performed after each time the shutter of the MAP-003 is turned to the "off" position.

TRANSPORTATION

62. The licensee may transport radioactive material in accordance with the provisions of Section 459.314 of the Nevada Administrative Code.

Condition 63 is for licenses authorizing the possession and/or use of portable devices containing radioactive materials.

63) In addition to the information required by the U.S. Department of Transportation for the transportation of radioactive materials, the shipping containers for devices must be labeled with the following information:

The device in this case contains radioactive material.
If found please call the telephone listed below.
If the case appears damaged, do not open.

Radiological Health Section	OR	Nevada Highway Patrol Dispatcher
Nevada State Health Division,		24-Hour Emergency Phone Number
(702) 687-5394 or (702) 687-5397		(702) 687-5300

WASTE DISPOSAL

64) The licensee is authorized to hold radioactive material with a physical half-life of less than 65 days for decay-in-storage before disposal in ordinary trash provided:

A. Radioactive waste to be disposed of in this manner shall be held for decay a minimum of 10 half-lives.

B. Before disposal as normal waster, radioactive waste shall be surveyed to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.

MISCELLANEOUS

65) This license does not authorize commercial distribution of radioactive material.

66) This license does not authorize possession or use of radioactive material.

67) This license does not authorize distribution to persons licensed pursuant to Sections 459.244 and 459.248 of the Nevada Administrative Code.

68) Radioactive material shall not be used in or on human beings.

69) Sealed sources containing radioactive material shall not be opened.

70) The licensee shall conduct a physical inventory every 6 months to account for all sourced and/or devices received and possessed under the license. Records of inventories shall be maintained for 2 years from the date of each inventory.

71) Pursuant to Section 459.326 (3) of the Nevada Administrative Code reliance on statement, procedures and representations made by the licensee in his _____. The following maximum radiation levels are hereby authorized in the following unrestricted areas:

Maximum Radiations Level	Unrestricted Area

PORTABLE GAUGES

72) The licensee shall instruct all users that any maintenance or repair of portable device involving removal of the sealed sources from the devices or removal or dismantling of

shielding may be performed only by the device manufacturer, or by other persons specifically authorized by the Nuclear Regulatory Commission or an Agreement State to perform such services.

73) Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container shall be locked when in transport or when not under the direct surveillance of an authorized user.

"TIE DOWN"

74. Except as specifically provided otherwise in this license, the license shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Chapter 459 of the Nevada Administrative Code shall govern unless the statements , representations and procedures in the licensee's application and correspondence are more restrictive that the regulations.

A.

B. (Documents should be listed chronologically)

C.

TERMINATION

75) Nevada Radioactive Material License No. ___-___-_____-__ is terminated.

Blood Irradiator License Conditions

10. Radioactive material shall be stored and used only at the licensee's facility located at xxxxxxxx Nevada.

11. Radioactive material shall be used by, or under the supervision of xxxxxxxxxx

12. The Radiation Safety Officer for activities authorized by this license shall be xxxxxxx

13.A. Sealed sources shall be tested for leakage at intervals required by the device manufacturer. Records of test results shall be kept in units of microcuries and maintained for inspection by the Division. In the absence of a certificate from a transferor indicating that a test has been made within 6 months before the transfer, a source received from another person shall not be used until tested for leakage.

B. The test shall be sufficiently sensitive to detect 0.005 microcurie of contamination on the test sample.

C. The test sample shall be taken from selected accessible surfaces of the irradiator unit. The selected accessible surfaces should be those surfaces on which one might expect contamination (if there were to be leakage) to accumulate. The test sample shall be taken with the source in the "safe" position.

D. If the test reveals the presence of 0.005 microcuries or more of removable contamination, the licensee shall immediately withdraw the source from use and take action to prevent spread of contamination. A report shall be filed within five (5) days of the test result is known with the Radiation Control Section, Bureau of Health Care Quality and Compliance, Nevada State Health Division, 4150 Technology Way, Suite 300, Carson City Nevada, 89706, telephone number (775) 687-7550. The report shall specify the source involved, the test results, and corrective action taken.

13.E. Tests for leakage and/or contamination shall be performed by persons specifically authorized by the Division of Health, the U.S. Nuclear Regulatory Commission, or an Agreement State to perform such services.

14. The procedures contained in the xxxxxxxxxxxxx operation manual for the Model xxxxxxx Laboratory Irradiator shall be followed and a copy of this manual shall be made available to each person using or having responsibility of use of the device.

15. Sealed sources containing radioactive material shall not be opened nor removed from the irradiator by the licensee.

16. The licensee shall not perform repairs or alterations of the irradiator involving removal of shielding or access to the radioactive material. Removal, replacement, and disposal of sealed sources in the irradiator shall be performed by a person specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement state to perform such services.

17.A. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Nevada Administrative Code (NAC) 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Medical – Imaging & Localization License Conditions
(Doc-in-a-box conditions)

10. Radioactive material shall be stored and used only at the licensee's facility described in Item 2, above.

11. Radioactive material shall be used only by, or under the supervision of:

xxxxxxxxxxx	xxxxxxxxxx	xxxxxxxxxxxx
xxxxxxxxxxx	xxxxxxxxxx	xxxxxxxxxxxx

12. The Radiation Safety Officer for activities authorized by this license shall be xxxxxxx The alternate Radiation Safety Officer will be xxxxxxx

13. The licensee shall comply with the provisions of 10 CFR 35, as those provisions existed on September 16, 2004

14. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. NAC 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Nuclear Pharmacy License Conditions

(note: This is from an actual license – Cardinal Health)

10. Radioactive material may be received, stored, used and prepared for distribution only at the licensee's facility located at 61 Spectrum Blvd., Las Vegas, NV 89101.

11.A. Radioactive material shall be used only by, or under the supervision of, authorized nuclear pharmacists authorized under Cardinal Health's NRC master license No. 34-29200-01MD providing those individuals possess a current Nevada pharmacist license.

B. At least one individual named in condition 11.A. shall be physically present at the authorized place of use whenever radioactive material is being used.

C. The licensee shall immediately notify the Radiological Health Section when a user is deleted from Cardinal Health's NRC master license No. 34-29200-01MD for cause.

D. The Radiation Safety Officer for activities authorized by this license shall be Carl Collier. The alternate Radiation Safety Officer shall be David Engstrom, Pharm.D., BCNP.

12. The licensee is authorized to transfer up to 600 kilograms of uranium contained as shielding material in generators.

13. Sealed sources containing radioactive material shall not be opened by the licensee.

4.A. Each sealed source containing radioactive material, other than hydrogen-3, with a half life greater than 30 days and in any form other than gas shall be tested for leakage and/or contamination at intervals not to exceed 6 months. In the absence of a certificate from a transferor indicating that a test has been made within 6 months before the transfer, a sealed source received from another person shall not be used until tested for leakage.

B. Notwithstanding the periodic leak test required by this condition, any licensed sealed source is exempt from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.

14.C. The periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources excepted from this test shall be tested for leakage prior to any use or transfer to another person unless they have been leak tested within six months prior to the date of use or transfer. Sources not leak tested under this condition must have their placement in storage and removal from storage formally documented.

D. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is permanently or semi-permanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Division.

E. If the test reveals the presence of 0.005 microcuries or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Nevada State Board of Health regulations. A report shall be filed within five (5) days of the test with the Radiological Health Section, Bureau of Health Protection Services, Nevada State Health Division, 4150 Technology

Way, Suite 300, Carson City, Nevada 89706, telephone number (775) 687-7550. The report shall specify the source involved, the test results, and the corrective action taken.

F. Tests for leakage and/or contamination shall be performed by the licensee, or by persons specifically authorized by the Nevada State Health Division, the U.S. Nuclear Regulatory Commission, or an Agreement State to perform such services.

15. The licensee shall conduct a physical inventory every 3 months to account for all sealed sources received and possessed under the license. The records of the inventories shall be maintained for 2 years from the date of the inventory for inspection by the Division. The inventory records shall include the quantities and kinds of radioactive material, manufacturer's name and model numbers, location of the sealed sources, date of the inventory and the initials of the person who performed the inventory.

16.A. The licensee shall perform tests to detect and quantify the activity of molybdenum-99 contamination in each elution of technetium-99m from a molybdenum-99/technetium-99 generator.

B. The licensee shall not distribute for human use technetium-99m that, at the expiration date and time shown on the package label, contains more than 0.15 microcuries of molybdenum-99 per millicurie of thechnetium-99m.

C. The expiration date and time shown on the package label shall be such that the limits above are not exceeded for any single patient dose. The limits for molybdenum-99 contamination represents maximum values and molybdenum-99 contamination should be kept as low as reasonably achievable below these limits.

D. The licensee shall establish written procedures for personnel performing the tests to detect and quantify molybdenum-99 contamination. These procedures shall include all necessary calculations and steps to be taken if activities of molybdenum-99 in excess of the limit specified in Subitem B, above, are detected.

E. Personnel performing tests to detect and quantify molybdenum-99 contamination shall be given specific training in performing these tests prior to conducting such tests.

F. The licensee shall maintain for inspection by the Division records of the results of each test performed to detect and quantify molybdenum-99 contamination and records of training given to personnel performing these tests.

G. Records described in Subitem F, above, shall be maintained for two (2) years following the performance of the tests and the training of personnel.

17. Reagent kits must be prepared and compounded from a prescription in accordance with the regulations of the Nevada Board of Pharmacy.

18. Reagent kits may be redistributed to persons licensed pursuant to 10 CFR 35.49 and 10 CFR 35.200 or under equivalent licenses of Agreement States, for diagnostic groups.

19. The licensee is not authorized to use radioactive material on or in human beings or in products distributed to the general public

20. The licensee is authorized to hold radioactive material with a physical half-life of less than 120 days for decay-in-storage before disposal in ordinary trash provided:

A. Radioactive waste to be disposed of in this manner shall be held for decay a minimum of 10 half-lives.

B. Before disposal as normal waste, radioactive waste shall be surveyed to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.

C. Generator columns shall be segregated so that they may be monitored separately to insure decay to background levels prior to disposal.

21. The licensee may use the Calicheck or Lineator devices for performing linearity tests of its dose calibrator, and as a customer service provided:

A. The procedures in the Calcorp, Inc. Manual dated March 2, 1982 are followed; or

B. The procedures in the Lineator Manual dated June 20, 1983 are followed.

C. At least annually a linearity test is performed by the decay method.

22. The licensee shall maintain the following records at the Las Vegas, Nevada facility for a period of two years:

A. A record of all radioactive material transferred to other persons. Such transfers shall be recorded on a daily basis and the record shall contain the amount of radioactive material transferred in millicuries and identification of the radionuclide and the recipient.

B. A record of all radioactive material received from other persons. The records of receipt of radioactive materials must be recorded on a daily basis and shall contain the amount of radioactive material received in millicuries and identification of the radionuclide and the supplier.

C. Notwithstanding paragraph B. above, the record for radioactive material received from customers in the form of unused doses of radiopharmaceuticals or radioactive waste shall contain the identity of the customer and the radionuclide, with an estimate of the quantity received in millicuries, corrected for decay.

23. The licensee may transport radioactive material in accordance with the provisions of NAC 459.314.

24. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Chapter 459 of the Nevada Administrative Code shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Broad Scope A License Conditions

(note: IC's conditions removed, and this is from an actual license – UNR-01)

.0.A. Radioactive material shall be stored and used at the licensee's facilities located at:

i) University of Nevada, Reno and Stead Campuses;
ii) Nevada Terawatt Facility, Fox Avenue, Stead, Nevada;
iii) Desert Research Institute, Maxey Science Center, 7010 Dandini Blvd., Reno, Nevada;
iv) Desert Research Institute, Southern Nevada Science Center, 755 E. Flamingo Rd., Las Vegas, Nevada; and
v) Little Valley, 3 miles West of Washoe Lake.

B.(1) Portable gauges containing radioactive material may also be used at temporary job sites of the licensee anywhere in the State of Nevada where the Division of Health Maintains jurisdiction for regulating the use of radioactive material.

(2) For each project involving portable gauge use on property which is not under the administrative control of the University of Nevada, Reno, written approval must be obtained from the owner of the property where portable gauge use is to occur. A copy of the written approval must be maintained available for inspection by the division.

C. Before radioactive materials can be used at a temporary jobsite at any federal facility, the jurisdictional status of the jobsite must be determined. The federal agency should be contacted to determine if the jobsite is under exclusive federal jurisdiction. A dated, written response must be submitted which includes the name, title of the person and telephone number at the federal agency that provided the determination.

Authorization for the use of radioactive materials at jobsites under exclusive federal jurisdiction shall be obtained either by:

1. filing a Nuclear Regulatory Commission (NRC) Form-241 to the NRC in accordance with 10 CFR 150.20(b), "Recognition of Agreement State Licensees"; or

2. by applying for a NRC specific license.

10.D. Before radioactive material can be used at a temporary jobsite in another state, authorization shall be obtained from the state if it is an agreement state, or from the NRC or any non-agreement state by filing for reciprocity or applying for a specific license from the appropriate agency.

E. Scandium-46 may also be used at Little Valley, 3 miles west of Washoe Lake, Nevada, at the Hot Springs Mountains, 10 miles East Northeast of Fernley, Nevada, at the Pine Nut Range, 8 miles Southeast of Carson City, Nevada and T 28 S, R 63 E, S 32, SWSE, West of Searchlight, Nevada.

F. Hydrogen-3 and Carbon-14 may be used by, or under the supervision of users authorized by the Radiation Safety Committee at temporary job sites of the licensee anywhere in the State of Nevada where the Division of health maintains jurisdiction for regulating the use of radioactive material. Radioactive material shall be used in accordance with the letter dated September 8, 1995, signed by Myung Chul Jo.

.1. The Radiation Safety Officer for activities authorized by this license shall be Myung Chul Jo.

12. Radioactive material shall be used only by, or under the supervision of, individuals designated by the UNR Radiation Safety Committee, Ronald A. Phaneuf, Ph.D., Chairman.

13.A. Sealed sources and detector cells containing radioactive material shall be tested for leakage and/or contamination at intervals not to exceed six months. Portable moisture/density gauges which contain sealed sources containing radioactive material shall be tested for leakage and/or contamination at intervals **required by the source or device manufacturer**.

B. Notwithstanding Paragraph A of this Condition, sealed sources designed to emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed three months.

C. In the absence of a certificate from a transferor indicating that a leak test has been made within six months prior to the transfer, a sealed source or detector cell received from another person shall not be put into use until tested.

13.D. Sealed sources and detector cells need not be leak tested if:

(i) they contain only hydrogen-3; or
(ii) they contain only a radioactive gas; or
(iii) the half-life of the isotope is 30 days or less; or
(iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting material; or
(v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transfer to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

E. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. If the test reveals the presence of 0.005 microcuries or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Nevada State Board of Health regulations. A report shall be filed within five (5) days of the test with the Radiological Health Section, Bureau of Health Protection Services, Nevada State Health Division, 4150 Technology Way, Room 300, Carson City, Nevada 89706, phone number (775) 687-7550.

F. The licensee is authorized to collect leak test samples for analysis. Alternatively, tests for leakage and/or contamination may be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.

G. Tests for leakage and/or contamination shall be performed by the licensee, or by persons specifically authorized by the Nevada State Health Division, the U.S. Nuclear Regulatory Commission, or an Agreement State to perform such services.

14. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.

15. Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport, storage, or when not under the direct surveillance of an authorized user.

16. The licensee shall instruct all users that any maintenance or repair of portable devices involving removal of the sealed sources from the devices or removal or dismantling of shielding may be performed only by the device manufacturer, or by other persons specifically authorized by the Nuclear Regulatory Commission or an Agreement State to perform such services.

17. Maintenance, repair, cleaning, replacement, and disposal of foils contained in detector cells shall be performed only by the device manufacturer or other persons specifically authorized by the Commission or an Agreement State to perform such services.

18.A. Detector cells containing a titanium tritide foil or a scandium tritide foil shall only be used in conjunction with a properly operating temperature control mechanism which prevents the foil temperatures from exceeding that specified in the certificate of registration referred to in 10 CFR 32.210.

B. When in use, detector cells containing a titanium tritide foil or a scandium tritide foil shall be vented to the outside.

19. The licensee may transport radioactive material in accordance with the provisions of NAC 459.314.

20. In addition to the information required by the U.S. Department of Transportation for the transportation of radioactive materials, the shipping containers for devices must be labeled with the following information:

The device in this case contains radioactive material.
If found, please call the telephone listed below.
If the case appears damaged, do not open.

Nevada State Health Division (8:00a-5:00p M-F):	(775) 687-7550
Nevada Highway Patrol (24 hrs) new number:	(775) 687-0400
Radiological Health 24 Hr. Emergency Number:	(877) 438-7231

21. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 2 years from the date of each inventory and shall include the quantities and kinds of radioactive material, manufacturer's name and model numbers, location of the devices, and the date of the inventory.

22. Radioactive material shall not be used in or on human beings.

23. The licensee shall not use radioactive material in field application where activity is released except as provided otherwise by specific condition of this license.

24. Experimental animals, or the products from experimental animals, that have been administered radioactive material shall not be used for human consumption.

25.A. The licensee is authorized to hold radioactive material with a physical half-life of less than or equal to 120 days for decay-in-storage before disposal in ordinary trash, provided:

(i) Waste to be disposed of in this manner shall be held for decay a minimum of ten half-lives.

(ii) Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.

B. A record of each such disposal permitted under this License Condition shall be retained for three years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.

26. Transfer for disposal and manifests

A. The requirement of this license condition and appendix G to 10 CFR Part 20 are designed to:

i. Control transfers of low-level radioactive waste by any waste generator, waste collector, or waste processor licensee, as defined in 459.1146 through 459.1148, who ships low-level waste either directly, or indirectly through a waste collector or waste processor, to a licensed low-level waste land disposal facility (as defined in 10 CFR Part 61 and NAC 459.0475);

ii. Establish a manifest tracking system; and

iii. Supplement existing requirements concerning transfers and record-keeping for those wastes.

B. In addition to the requirements for shipping of radioactive waste in NAC 459, the requirements of Appendix G to 10 CFR 20 also apply to all licenses.

C. Any licensee shipping radioactive waste intended for ultimate disposal at a licensed land disposal facility must document the information required on the U.S. Nuclear Regulatory Commission's Uniform Low-Level Radioactive Waste Manifest and transfer this recorded manifest information to the intended consignee in accordance with appendix G to 10 CFR Part 20 or equivalent NAC 459 regulations.

D. Each shipment manifest must include a certification by the waste generator as specified in section II of appendix G to 10 CFR Part 20.

E. Each person involved in the transfer for disposal and disposal of waste, including the waste generator, waste collector, waste processor and disposal facility operator, shall comply with the requirements specified in section III of appendix G to 10 CFR Part 20.

.7. Each portable gauge licensee shall use a minimum of two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal, whenever portable gauges are not under the control and constant surveillance of the licensee.

Distribution License Conditions

10. Radioactive material shall be distributed only from at the licensee's facility located at the licensees facility described in Item 2, above.

11. The following table lists the devices which the licensee is authorized to distribute pursuant to the terms and conditions of this license. Column 1 lists the device model number, and columns 2 and 3 identify the manufacturer, model number, and maximum activity of the sealed source(s).

Device Model	Sealed Source Manufacturer/Model No.	Activity
a. xxxxxxxxxxxxxxxxxxxxxxxx	xxxxxxxx	xxxxxx

12. The devices authorized for distribution under Item 9 of this license shall be only those devices which are manufactured under Nevada Radioactive Material License No. 03-11-0523-01 and are described in the following documents:

    a. Application dated xxxxxxx.
    b. Letter dated xxxxxxxx, signed by xxxxxxxx
    c. The Sealed Source and Device Registry certificate xxxxxxxxxxx.

13. The Radiation Safety Officer for activities authorized under this license shall be xxxxxxx.

14. This license does not authorize possession or use of radioactive material. *(IF applicable)* Possession is authorized under Nevada Radioactive Material License No. xxxxxx.

15. The licensee shall report all transfers of radioactive material under this license. Reports shall be filed with the regulatory agencies having jurisdiction over the recipients of the radioactive material. Reports to each agency shall be filed within 30 days after the end of each calendar quarter in which applicable transfers have occurred. The reports shall specify:

    a. The name and address of the regulatory agency to whom the report is directed;
    b. The authority for transfer, i.e., the name of the licensee specified in Item 1 of this license, and the license number specified in Item 3 of this license;
    c. The name, address, and phone number of the generally licensed recipient (for the contact person and location of use);
    d. The number of devices and specific model number and serial number of devices, together with an indication of the nuclides and quantities contained in each device transferred to each generally license recipient.

    Copies of all reports required by this condition shall be maintained for inspection by the Division.

16. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Nevada Administrative Code (NAC) 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Manufacturing License Conditions

10. Radioactive material shall be stored and used only at the licensee's facility described in Item 2, above.

11. Radioactive material shall be used only by, our under the supervision of, xxxxx.

12. The Radiation Safety Officer for activities authorized by this license shall be xxxxxxx.

13. The licensee shall conduct a physical inventory every six months to account for all sealed sources and/or devices received and possessed under the license. Records of the inventories shall be maintained for inspection, and may be disposed of following Division inspection.

14. Radiation detection instruments used to perform wipe test analysis shall be tested for proper operation in accordance with the manufacturer's instructions.

15. This license does not authorize commercial distribution of licensed material. (IF applicable) Distribution is authorized under Nevada Radioactive Material License No. xxxxxx.

16. Licensed material shall not be used in or on human beings.

17. Sealed sources or plated sources containing radioactive material shall not be opened by the licensee.

18. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Nevada Administrative Code (NAC) 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Industrial Radiography Conditions

10.A. Radioactive material shall be stored at the licensee's facility described in Item 2, above, and may be at temporary job sites of the licensee anywhere in the State of Nevada where the Nevada State Division of Health maintains jurisdiction for regulating the use of radioactive material.

B. Before radioactive materials can be used at a temporary job site at any Federal facility, the jurisdictional status of the job site must be determined. If the jurisdictional status is not known, the Federal agency should be contacted to determine if the job site is under exclusive Federal jurisdiction. A response should be obtained in writing or a record should be made of the name and title of the person at the Federal agency who provided the determination and the date it was provided.

C. Authorization for the use of radioactive materials at job sites under exclusive Federal jurisdiction shall be obtained either by:

(1) Filing a NRC Form-241 in accordance with 10 CFR 150.20(b), "Recognition of Agreement State Licensees"; or

(2) By applying for a specific NRC license.

D. Before radioactive material can be used at a temporary jobsite in another state, authorization shall be obtained from the state if it is an agreement state or from the NRC or any non-agreement state by filing for reciprocity or applying for a specific license from the appropriate agency.

11. Radioactive material shall be used by, or under the supervision and in the physical presence of, John Doe or individuals who have been trained as described in the Administrative, Operations, and Emergency Procedures Manual dated xxxxxxx.

12. The radiation safety officer for activities authorized by this license shall be xxxxxx.

13. The licensee is authorized to receive, possess, and use sealed sources of Iridium-192 where the radioactivity exceeds the maximum amount of radioactivity specified in this license provided:

A. Such possession does not exceed the quantity per source specified in Item 8 by more than 20%;

B. Records of the licensee show that no more than the maximum amount of radioactivity per source specified in this license was ordered from the supplier or transferor of the licensed material; and

C. The levels of radiation for radiographic exposure devices and storage containers do not exceed those specified in 10 CFR 34.21.

14. The licensee is authorized to possess, use, transfer, and import up to 450 kilograms of uranium contained as shielding material in the radiography exposure devices and source changers authorized by this license.

15.A. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. Chapter 459 of the Nevada Administrative Code shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

1. Application dated xxxxx, signed by xxxxxx
2. Administrative, Operations, and Emergency Procedures Manual dated xxxxxxxx

3. Letters dated xxxxxxx, from the Radiation Control Section.

B. The licensee shall comply with the requirements described in the Radiological Health Section letter dated xxxxxxxxxxx, and attached document entitled "Increased Controls for Licensees that Possess Sources Containing Radioactive Material Quantities of Concern." The licensee shall complete implementation of said requirements within 6 months from the issuance of the license amendment or the first day that radionuclides in quantities of concern are possessed at or above the limits specified in Table 1 of the attachment, whichever is later. Within 25 days after the implementation of the requirements of this condition, the licensee shall notify the Radiation Control Section in writing that it has completed the requirements of this condition.

C. The licensee shall comply with the requirements described in the document (NRC Order EA-07-305 with attachments dated December 5, 2007) entitled "Fingerprinting and Criminal History Records Check Requirements for Unescorted Access to Certain Radioactive Material." The requirements listed in the NRC Order shall be implemented as part of the trustworthiness and reliability program of the Increased Controls requirements.

By August 13, 2008, the licensee shall provide under oath or affirmation, a certification that the Trustworthiness and Reliability Official is deemed trustworthy and reliable by the licensee as required in paragraph B.2. of the U.S. Nuclear Regulatory Commission (NRC) Order EA-07-305, published in the Federal Register on December 13, 2007 [72 FR 70901].

All fingerprints obtained by the licensee pursuant to this requirement must be submitted to the NRC for transmission to the U.S. Federal Bureau of Investigation (FBI). Additionally, the licensee's submission of fingerprints shall also be accompanied by a certification, under oath and affirmation, of the trustworthiness and reliability of the Trustworthiness and Reliability Official as required by paragraph B.2. of NRC Order EA-07-305.

The licensee shall complete implementation of the fingerprinting requirements by November 10, 2008. The licensee shall notify the Nevada Radiological Health Section when they have achieved full compliance with the requirements described in the NRC Order. The notification shall be made within twenty-five (25) days after full compliance has been achieved.

The licensee shall notify the Nevada Radiological Health Section within 24 hours if the results from a criminal history records check indicate that an individual is identified on the FBI's Terrorist Screening Data Base.

Fixed Gauge Conditions

10. Gauges containing radioactive material shall be stored and used only at the licensee's facility (add location of fixed facility).

11. Gauges containing radioactive material shall be used only by

12. The Radiation Safety Officer for activities authorized by this license shall be XXXX. The Alternate Radiation Safety Officer for activities authorized by this license shall be XXXX

13. Sealed sources containing radioactive material shall not be opened or removed from the gauge by the licensee.

14.A. Gauges containing radioactive material shall be tested for leakage and/or contamination at intervals specified by the gauge manufacturer. In the absence of a certificate from a transferor indicating that a test has been made within six (6) months prior to the transfer, a sealed source received from another person shall not be put into use until tested.

14.B. The test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Nevada State Health Division.

C. The periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources excepted from this test shall be tested for leakage prior to any use or transfer to another person unless they have been leak tested within six (6) months prior to the date of use or transfer. Sources not leak tested under this condition must have their placement in storage and removal from storage formally documented.

D. If the test reveals the presence of 0.005 microcuries (185 becquerels) or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Nevada State Board of Health regulations. A report shall be filed within five (5) days of the test with the Radiation Control Program, Bureau of Health Care Quality and Compliance, Nevada State Health Division, 4150 Technology Way, Suite 300, Carson City Nevada, 89706, and telephone number (775) 687-7550. The report shall specify the source involved, the test results, and corrective action taken.

E. Tests for leakage and/or contamination shall be performed by the licensee, or by persons specifically authorized by the Nevada State Health Division, the U.S. Nuclear Regulatory Commission, or an Agreement State to perform such services.

15. Installation, initial radiation survey, relocation, or removal from service of devices containing sealed sources shall be performed only by (insert name if trained) or persons specifically licensed by the Division, the Nuclear Regulatory Commission or an Agreement State to perform such services. The manufacturer's instructions shall be followed when performing these operations. Maintenance and repair of devices and installation, replacement, and disposal of sealed sources shall be performed only by persons specifically licensed by the Division, the Nuclear Regulatory Commission or an Agreement State to perform such services.

16. The licensee shall conduct a physical inventory every six (6) months to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 2 years from the date of each inventory and shall include the quantities and kinds of radioactive material, manufacturer's name and model numbers, location of the sources and/or devices, and the date of the inventory.

17. Except during periods of prolonged storage, source holders containing radioactive materials shall be tested for proper operation of the on-off mechanism and indicator, if any, at the time of installation of the device or replacement of the radioactive material on the premises and thereafter at no longer that six (6) month intervals. Records of the required tests shall be maintained for inspection by the Nevada State Health Division.

18. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. NAC 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Portable Gauge Conditions

10.A. Gauges containing radioactive material shall be stored and used at the licensee's facility described in Item 2 above and used at temporary job sites of the licensee anywhere in Nevada where the Nevada State Health Division maintains jurisdiction for regulating the use of radioactive material.

B. Before radioactive materials can be used at a temporary job site at any federal facility, the jurisdictional status of the job site must be determined. The federal agency should be contacted to determine if the job site is under exclusive federal jurisdiction. A dated, written response must be submitted which includes the name, title of the person and telephone number at the federal agency that provided the determination.

Authorization for the use of radioactive materials at job sites under exclusive federal jurisdiction shall be obtained either by:

1. filing a Nuclear Regulatory Commission (NRC) Form-241 to the NRC in accordance with 10 CFR 150.20(b), "Recognition of Agreement State Licensees"; or

2. by applying for a NRC specific license.

C. Before radioactive material can be used at a temporary job site in another state, authorization shall be obtained from the state if it is an Agreement State, or from the NRC or any non-Agreement State by filing for reciprocity or applying for a specific license from the appropriate agency.

11. Gauges containing radioactive material shall be used only by xxxxxx or by persons who have successfully completed the manufacturer's training course or an equivalent training course that has been evaluated and approved by the U.S. Nuclear Regulatory Commission or an Agreement State. The licensee shall review a user's credentials prior to authorization for use of radioactive materials under the license, maintain a list of individuals who have been designated as users and maintain all applicable training records.

12. The Radiation Safety Officer for activities authorized by this license shall be xxxxx. The Assistant Radiation Safety Officer for activities authorized by this license shall be xxxxx.

13. Sealed sources containing radioactive material shall not be opened or removed from the gauge by the licensee.

14.A. Gauges containing radioactive material shall be tested for leakage and/or contamination at intervals required by the gauge manufacturer. In the absence of a certificate from a transferor indicating that a test has been made within six (6) months prior to the transfer, a sealed source received from another person shall not be put into use until tested.

B. The test shall be capable of detecting the presence of 0.005 microcuries (185 Becquerels) of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries or becquerels and maintained for inspection by the Nevada State Health Division.

C. The periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources excepted from this test shall be tested for leakage prior to any use or transfer to another person unless they have been leak tested within six (6) months prior to the date of use or transfer. Sources not leak tested under this condition must have their placement in storage and removal from storage formally documented. No sealed source or device containing licensed material shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

D. If the test reveals the presence of 0.005 microcuries (185 Becquerels) or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Nevada State Board of Health regulations. A report shall be filed within five (5) days of the test with the Radiation Control Program, Bureau of Health Care Quality and Compliance, Nevada State Health Division, 4150 Technology Way, Suite 300, Carson City, Nevada 89706, phone number (775) 687-7550.

E. Tests for leakage and/or contamination shall be performed by the licensee, or by persons specifically authorized by the Nevada State Health Division, the U.S. Nuclear Regulatory Commission, or an Agreement State to perform such services.

15 The licensee shall instruct all users that any maintenance or repair of portable devices involving removal of the sealed sources from the devices or removal or dismantling of shielding may be performed only by the device manufacturer, or by other persons specifically authorized by the Nuclear Regulatory Commission or an Agreement State to perform such services.

16. The licensee may transport radioactive material in accordance with the provisions of Section 9 of R149-07, Revisions to NAC 459, effective January 30, 2008.

17. In addition to the information required by the U.S. Department of Transportation for the transportation of radioactive materials, the shipping containers for devices must be labeled with the following information:

The device in this case contains radioactive material.
If found, please call the telephone listed below.
If the case appears damaged, do not open.

Nevada State Health Division (8:00a-5:00p M-F):	(775) 687-7550
Radiological Health 24 Hr. Emergency Number	(877) 438-7231
Nevada Highway Patrol (24 hrs):	(775) 687-0400

18. The licensee shall conduct a physical inventory every six (6) months to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 2 years from the date of each inventory and shall include the quantities and kinds of radioactive material, manufacturer's name and model numbers, device serial numbers, location of the devices, and the date of the inventory.

19. Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport, storage or when not under the direct surveillance of an authorized user.

20. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. NAC 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Medical – Uptake & Dilution/Imaging & Localization/Therapy/Brachytherapy

(These standard conditions taken from an actual license for reference)

10. Radioactive material shall be stored and used only at the licensee's facility described in Item 2, above.

11.A. Radioactive material described in 10 CFR 35.300, 10 CFR 35.400, and Items 6, 7, and 8, Subitems xxxxxxx through xxxxxxx and xxxxxx shall be used by, or under the supervision of, the following individuals:

xxxxxxxxxx	xxxxxxxxx	xxxxxxxxxxxx
xxxxxxxxxx	xxxxxxxxx	xxxxxxxxxxxx

11.B. Radioactive material described in 10 CFR 35.100, 10 CFR 35.200, 10 CFR 35.300 and Items 6, 7, and 8, Subitems xxxxxxx and xxxxxxxxxx shall be used by, or under the supervision of xxxxxxxxx

C. Radioactive material described in 10 CFR 35.400 and in Items 6, 7 and 8, Subitems xxxxxxxxxx and xxxxxx shall be used by, or under the supervision xxxxxxxx. or xxxxxxxxx

D. Radioactive material described in 10 CFR 35.300, 10 CFR 35.400, and Items 6, 7 and 8, Subitems xxxxxxxxxx and xxxxxxx shall be used by, or under the supervision of, the following individuals:

xxxxxxxxxxxx	xxxxxxxxxxxx	xxxxxxxxxx.

E. Radioactive material described in Items 6, 7 and 8, Subitems L and N, above shall be used by, or under the supervision of, xxxxxxxxxx., xxxxxxxx, and xxxxxxxx.

12. The Radiation Safety Officer for activities authorized by this license shall be xxxxxxxx The Associate Radiation Safety Officer authorized under the license shall be xxxxxxxxxxx.

13.A. Individuals working with Iodine-131 in quantities greater than 1.0 millicurie per calendar quarter with chemical and physical forms that make it possible that radionuclides will be ingested, inhaled or absorbed shall be included in a bioassay program. Bioassay shall be performed within six to seventy-two hours after exposure to radioiodine.

13.B.

(1) Notwithstanding the requirement in Part A. above, individuals participating in the medical administration of Iodine-131 in capsule or liquid form in a closed system (i.e. sealed vial and double lumen needle patient delivery system.), in quantities greater than 1 millicurie per calendar quarter and less than 15 millicuries per patient, shall be included in a quarterly bioassay program. The quarterly bioassay shall be performed within six to seventy-two hours after exposure to radioiodine.

(2) Individuals exposed to Iodine-131 due to an accidental spill, crushed capsule, or patient vomiting; or individuals exposed to a quantity equal to 15 millicuries or larger shall participate in a bioassay program in accordance with Part A. above.

C. Bioassays for Iodine-131 shall consist of the measurement of the amount of radioiodine contained in the thyroid compared to a suitable standard.

D. (1) Thyroid burden of less than 0.04 microcuries of Iodine-131 will require no action.

(2) Thyroid burdens of 0.04 microcuries or greater of Iodine-131 shall be investigated as to the circumstances surrounding the uptake. Bioassays shall continue at weekly intervals until the thyroid burden has dropped below the levels specified in D.(1).

(3) Should the thyroid burdens exceed 0.14 microcuries of Iodine-131, the licensee shall restrict the worker from further radioiodine exposure until the burden falls below the levels specified in D.(1).

13.E. Individuals working with Iodine-125 in quantities greater than 1.0 millicurie per calendar quarter with chemical and physical forms that make it possible that radionuclides will be ingested, inhaled or absorbed shall be included in a bioassay program. Bioassay shall be performed within six to seventy-two hours after exposure to radioiodine.

F (1) Notwithstanding the requirement in Part A. above, individuals participating in the medical administration of Iodine-125 in liquid form in a GliaSite System, in quantities greater than 1 millicurie per calendar quarter and less than 15 millicuries per patient, shall be included in a quarterly bioassay program. The bioassay shall be performed within six to seventy-two hours after exposure to radioiodine.

(2) Individuals exposed to Iodine-125 due to an accidental spill, of any amount of Iodine-125, or individuals exposed to a quantity equal to 15 millicuries or larger shall participate in a bioassay program in accordance with Part A. above.

G. Bioassays for Iodine-125 shall consist of the measurement of the amount of radioiodine contained in the thyroid compared to a suitable standard.

H .(1) Thyroid burden of less than 0.06 microcuries of Iodine-125 will require no action.

(2) Thyroid burdens of 0.06 microcuries or greater of Iodine-125 shall be investigated as to the circumstances surrounding the uptake. Bioassays shall continue at weekly intervals until the thyroid burden has dropped below the levels specified in H.(1).

(3) Should the thyroid burdens exceed 18 microcuries of Iodine-125, the licensee shall restrict the worker from further radioiodine exposure until the burden falls below the levels specified in H.(1).

I. Records of all bioassay measurements described above will be maintained as part of the personnel dosimetry, retained indefinitely, and be made available for inspection by the Nevada State Health Division.

14. The following conditions and limitations apply to use of all makes of Intravascular Brachytherapy systems authorized by this license:

A. The authorized user, interventional cardiologist/physician, and medical physicist will receive the vendor training for use of the device.

B. Procedures will be conducted under the supervision of the authorized user, who will consult with the interventional cardiologist/physician and medical physicist prior to initiating treatment. The procedures will be conducted in the physical presence of the authorized user or the medical physicist.

C. Prior to treatment, the written directive must specify treatment site, the radionuclide, and dose.

D. Prior to the first patient treatment, independent measurement of source output must be performed by the medical physicist. Instrumentation used to perform these calibrations must have been appropriately calibrated by a laboratory accredited by NIST or AAPM with the previous two years and after any servicing that may have affected system calibration. (See NAC 459.3911.1 for comparable requirements)

E. Written emergency procedures must be developed, implemented, and maintained for both stuck and detached sources, including the provision of appropriate emergency response equipment and any appropriate surgical procedures.

F. The licensee shall ensure that a survey of patient and IVB treatment catheter is performed immediately following source retraction or removal to confirm complete retraction of the source(s) as specified in NAC 459.3871.3.

G. The licensee's Quality Management Program should be revised as appropriate.

H. The delivery device and source assembly must be kept in locked storage when not being used. The licensee must maintain key control for the console key to allow access only by authorized personnel.

I. Shielding calculations are not necessary for areas outside the treatment room and device storage areas for sources which are beta emitters.

J. The device shall be inspected and serviced at intervals recommended by the manufacturer, and that maintenance and repair shall be performed only by the manufacturer or persons specifically licensed by NRC or an Agreement State to perform such services.

K. Daily checks must be performed (prior to patient treatment) in accordance with the manufacturer's instructions to include: console operational checks, indicator lamps, source status indicators; visual inspection of the integrity of the source centering catheter and connectors; and source positioning accuracy.

15. The following conditions and limitations apply to use of the Guidant GALILEO™ Intravascular Brachytherapy systems:

A. The working life of a cartridge/source assembly shall be limited to sixty (60) days or 650 cycles, whichever comes first. The cartridge or GDT P-32 Series source may only be used in GALILEO™ or another IVP device for which an evaluation has been performed by the U.S. Nuclear Regulatory Commission (NRC), or an Agreement State, or broad licensee with proper authority and in accordance with NRC Information Notice 99-24 or equivalent guidance from Agreement State authorities.

B. The following tests must be performed at each source exchange (prior to patient treatment): contact radiographs to check integrity of welds; source uniformity via autoradiograph; source positioning accuracy within +/- 1 mm; battery backup for emergency source retraction upon power failure; source transit time to meet manufacturer's specifications; and timer accuracy and linearity to meet manufacturer 's specifications.

C. The FDA approval includes a single step or pullback procedure, where the proximal position of the first treatment site is coincident with the distal position of the second treatment site in the center of the stent, is authorized. Alternative stepping or pullback procedures are subject to applicable FDA regulations and conditions of the device FDA approval.

D. Training in the proper use of GALILEO™ shall be provided by the manufacturer and include review of the Operator's Manual, the safe use of the device for routine and emergency conditions as well as cartridge exchange by the Licensed Medical Physicist.

E. The sources will be leak tested prior to shipment to document that they are not leaking. Because of the short half life of the radionuclide and limited useful life of its dedicated cartridge, no further teak tests will be made prior to the user transferring the sealed source to the manufacturer.

F. The licensee shall not cut, splice or alter the source wire in any manner except in emergency situations as stipulated in the Operator's Manual. Emergency procedures shall be prominently posted and/or

immediately available to personnel whenever GALILEO™ is used either for patient treatment or during QA procedures performed by Licensed Medical Physicists.

G. The GALILEO™ shall not be used for treatment until QA tests are performed in accordance with the manufacturers instructions. Records must be maintained licensee to document each test and procedure performed.

H. Only manufacturer provided, single use, sterile catheters may be used with GALILEO™ for patient treatments. Quality assurance tests and measurements shall only be performed with the accessories provided or recommended by the manufacturer and in strict accordance with the procedures specified in the Operator's Manual.

16. The following conditions and limitations apply to use of the Novoste Intracoronary Radiation System or Beta-Cath System™ Intravascular Brachytherapy systems:

A. An introducer sheath must be used, unless such use is contraindicated for an individual patient.

B. A dual syringe system must be used, unless such use is contraindicated for an individual patient, or is contrary to the manufacturer's instructions.

C. Source separations during treatment should be evaluated as possible medical events as described in 10 CFR 35.3045.

17. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. NAC 459 shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

TAB 10

TECHNICAL PROCEDURES FOR LICENSING, MODEL LICENSES, REVIEW GUIDES

Bureau of Health Care Quality and Compliance
Radiation Control Program

Licensing Procedures

The current licensing procedures that are utilized by the state of Nevada Radiation Control Program:

1. Commonly used Nuclear Regulatory Commission Consolidated Guidance About Materials Licenses, NUREG-1556 series, are used for a foundation for all licensing actions.
    a. Vol. 1 Portable Gauge - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v1/r1/
    b. Vol. 2 Industrial Radiography - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v2/
    c. Vol. 4 Fixed Gauges - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v4/
    d. Vol. 5 Self-Shielded Irradiators - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v5/
    e. Vol. 9 Medical Use licenses - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v9/r2/
    f. Vol. 13 Commercial Radiopharmacy - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v13/r1/
    g. Vol. 20 Administrative licensing Procedures - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v20/
    h. Additional volumes are looked at as needed - http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/
2. Locally generated checklists accompany some licensing actions.
    a. Fixed and portable gauges.
    b. Checklist for additional licensing actions will be generated in the future.

Bureau of Health Care Quality and Compliance
Radiation Control Program
Gauge Licensing/Renewal Checklist

1. Complete Pre-licensing Review.

2. If IC participant all information is minimum Official Use Only. Treat all information regarding this licensee with the appropriate caution and sensitivity. Review NSTS if necessary.

3. Review the appropriate NUREG-1556 Vol licensing checklist.

4. Signature of application by management or person authorized to sign original documents.
    a. For new licensee's assure there is documentation of who has signatory authority for the client and those person's have signed the application.
    b. For existing licensee's assure the person singing the renewal has authority to do so.
        i. An RSO signature may be acceptable if supported by client management.

5. Location of Use.
    a. Temporary Job Sites
    b. Addresses of each permanent facility
    c. Letter from the land lord stating that they are aware of the storage of RAM.

6. Users
    a. Name(s) and training of each individual users.
    b. Commitment that each employee will complete device manufacturer's training program or equivalent before using a device.

7. Radiation Safety Officer (RSO).
    a. Name, training and/or experience of the RSO applicant.
    b. Duties and responsibilities of the RSO
    c. Letter from RSO accepting the RSO duties and responsibilities.
8. Devices
    a. Mfr and model no. of each sealed source.
    b. Mfr and model no. each gauge or device.
    c. Activity of each sealed source
    d. Type of material in each sealed source

9. Describe the use of each device or gauge
    a. E.g. – measure moisture and density of construction material.

10. Are the gauges listed on the Sealed Source and Device Registry
    a. Review inventory and check SSDR for the Gauges listed.
    b. Limit the license to the amount of gauges the licensee has or is asking for.

11. Facilities and Equipment
    a. Diagram including; Scale, the direction North, and the proximity of the gauge storage area to the surrounding areas, and the occupancy factor of the area.
    b. Means of preventing access to unauthorized personnel and a description of the two tangible barriers used in securing the location.

12. The name of the supplier of the personnel monitoring devices and the exchange frequency. Are they NVLAP approved?
13.
    a. If the licensee does not use dosimetry due to 10% rule they need to resubmit proof that they are below the 10% annual exposure limit

14. Radiation Survey Instruments
    a. Do the instruments require calibration and what is the frequency?
        i. Name of the commercial company

15. Leak Testing
    a. Name of the commercial company supplying and completing leak testing.
    b. Licensee's procedures for analysis.
    c. Procedures for doing performing leak tests if the test will be done by individuals other than the RSO.

16. Maintenance
    a. A statement that any maintenance will be done with the sources in the shielded position.
    b. Radiation safety procedures for removing the removing the source rod
        i. Or a statement saying all non routine maintenance will be performed by a licensed contractor.

17. A statement that a gauge will be transported in accordance with U.S. DOT regulations.

18. Operating and Incident Response Procedures
    a. Instructions that personnel will wear their personnel dosimeters while working with gauges and devices.
    b. Step by step procedures for use of the device
        i. Reference to manufactures instructions acceptable.
    c. Procedures for storage of the device when not in use or under physical surveillance. Reference to two tangible barriers.
    d. Procedures for transporting devices to and from work sites.
    e. Steps for workers to take in case of Incident Response.
        i. Contact information for those who should be notified
            1. RSO, Radiological Health

19. Disposal
    a. Transfer or Disposal will be conducted by a licensee or waste brokers specifically authorized to posses the gauge or device.

20. Documents referenced in the application but not included for review.

Pre-Licensing Checklist

Company _____ Date Received_____

Assigned to_____ Date Assigned_____

1a. Identify valid business license from secretary of state database or other state equivalent business registration database. Yes No N/A

Notify licensing staff immediately if valid business license is not available.

http://sos.state.nv.us/ http://sandgate.co.clark.nv.us/businessLicense/businessSearch/blindex.asp

1b. If a physician or dentist is being added or applying for a license verify credentials from appropriate board. Yes No N/A

Notify licensing staff immediately if valid credentials are not available. http://medboard.nv.gov/ http://nvboo.glsuite.us/glsuiteweb/homeframe.aspx http://www.nvdentalboard.org/ https://www.nvvetboard.us/Renewal/glsweb/homeframe.aspx

---

2. Is the licensee request below the category 2 limits of radionuclides. Yes No

3. Valid government identification must be presented by license applicant signatory or RSO. Yes No

The valid ID must be a current (not expired) federal or state government Picture I.D. The ID picture needs to match the following:

Personal appearance must match the photo ID Yes No

Name must match the name on the license application and/or business license. Yes No

4. Verify business address name and store front. Yes No

Does the store front exist at the address on the application?

5. Verify land owner is aware of the storage/use of RAM. Yes No N/A

If the licensee leases property they must produce documentation that shows the land owner is aware of the storage and or use of RAD materials.

6. Conduct pre-license visit. Yes No

7. If all Items are complete (yes is marked) proceed to step 8

8. Hand deliver license after cross referencing all information to verify legitimacy of business and the person applying for the license. Yes No

Review licensee conditions with new licensee.

Reciprocity Hardship Policy Statement for 2009

NAC 459.210 (1) b Reciprocal Recognition of Licenses.
The out-of-state licensee notifies the Division in writing at least 3 business days before engaging in the proposed activity and receives written permission from the Division to proceed with the proposed activity. The notification must indicate the location, period and type of proposed possession and use within the State, and must be accompanied by a copy of the specific license. If, for a specific case, the 3-day period would impose an undue hardship on the out-of-state licensee, he may apply to the Division and obtain written permission to proceed sooner.

The Nevada State Health Division, Bureau of Health Care Quality and Compliance, Radiation Control Program, will allow for hardship applications for the processing of reciprocity applications that are received with less than three business days notice. The application for hardship must include a written narrative that explains the nature of the hardship. All applications received with less than three business days notice and without hardship narrative will be completed upon availability of the office staff and the necessary time it takes to complete the application review.

A hardship is generally reserved for a public health and safety emergency or a business emergency that would cause significant loss of work. The final decision for granting hardship will be determined by the Radiation Control Program Manager Health Supervisor and Senior Licensing Staff.

For more information please call our Radioactive Materials licensing staff at (775) 687-7550.

Sincerely,

Karen K. Beckley

Reciprocity Processing Checklist

Company _____ Date Received_____

Assigned to_____ Date Assigned_____

Has the company paid the appropriate fee for 180 days of reciprocity? Yes No
If not paid notify company and do not allow for reciprocity.

Does the company have enough days left to support the reciprocity? Yes No
If not notify the company as soon as possible.

Is the company name and address correct? Yes No
This information includes the company name, address and phone number.
If incorrect please notify company as soon as possible.

Do we have the requestor's license and is it current? Yes No
If the license or amendment is not current contact the radiation authority who granted the license, to include all agreement states and the NRC.

Verify license with State of issuance or NRC on all reciprocities. Yes No
Check compliance, inspection history and for outstanding violations.

Is the RSO name and contact information correct? Yes No
If the RSO information is not correct then initiate contact.

Are radiation sources asked to be used listed on the requestor's license? Yes No
Check NRC SSDR about radiation source material if necessary.

Is the location of use and management contact information provided? Yes No
This includes a point of contact, address and dates of use. Check license to assure use location limitations do not exist. Initiate contact if needed.

Is the reciprocity letter signed by the Radiological Health Supervisor? Yes No

Return the finished reciprocity to clerical staff for distribution. Yes No
If clerical staff is not available please fax to the licensee.

Enclosure – License
Enclosure – Duties of the Radiation Safety Officer

CC: John Smith, CRSO

KB\ts\

Duties of the Radiation Safety Officer

The Radiation Safety Officer is expected to coordinate the safe use of radioactive materials and ensure compliance with Nevada Administrative Code (NAC) 459.

The Radiation Safety Officer's duties must include at least the following:

A. To assure that radioactive materials possessed under the license conform to the materials authorized by the license.

B. To assure that use of radioactive materials is only by individuals authorized by the license.

C. To assure that all users wear personnel monitoring equipment such as film badges or thermoluminescence dosimeters (TLD), when required.

D. To assure that radioactive materials are properly secured against unauthorized removal at all times when they are not in use.

E. To serve as a point of contact and give assistance in case of emergency (source damage, fire, theft, etc.). To assure that proper authorities (such as police or state personnel) are notified promptly in case of accident or damage to the sources.

F. To assure that the terms and conditions of the license, such as periodic leak tests, inventories, etc., are met and that the required records, such as personnel exposure records, leak test records, etc., are periodically reviewed for compliance with NAC 459 requirements and license conditions.

G. To ensure that U.S. Department of Transportation regulations are followed when gauges are transported.

H. To assure that the radiation protection program is reviewed at intervals not to exceed one year as required by NAC 459.321.3.

I. Notify our office in writing of any change in mailing address or physical address **before the change occurs**.

J. Notify our office in writing of any change in the Radiation Safety Officer **before the change occurs**.
