Summary: Licensee sent a fax addressing the telephone message on August 7, 2009. The authorized user (AU) did not have the training and experience required to be named on the license. I explained this to the licensee and inquired on the proposed radiation safety officer (RSO) and realized he wasn't qualified by training experience for the types and quantities of radioactive material to be authorized on the license. I explained what would be adequate training and experience for both the authorized user and RSO. I told the licensee I would send him a deficiency e-mail.
