RE: Paducah Gaseous Diffusion Plant, GDP 09-0021

Steve,

I am responding to your letter, dated August 10, 2009 (ADAMS Accession No. ML092240061), in which United States Enrichment Corporation (USEC) transmitted its certificate amendment request (CAR) supporting its proposed revisions to Technical Safety Requirements regarding Cylinder Categories definition for Paducah Gaseous Diffusion Plant (PGDP). Specifically, the proposed changes to PGDP TSR would allow heating 48OM, 30A, 48A, and 48F cylinders in the C-333-A, C-337-A, and C-360 facilities at PGDP.

As part of the screening process, the NRC staff has completed the review of the information that USEC provided on August 10, 2009, and found the information acceptable for detailed review. During this review, we will notify you if any additional information, or clarification of existing information, is needed. The staff efforts associated with this review will be charged to Technical Assignment Control (TAC) number L32733. Please reference this TAC number in all correspondence related to this action.

Based on our preliminary review and projection of current review schedules, we anticipate completing our review of your request by late February 2010. This date could change depending on the findings of our technical/administrative review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule.

If you have any questions, please contact me at (301) 492-3217 or via e-mail at tilda.liu@nrc.gov.

Tilda Liu
Senior Project Manager
NMSS/FCSS/AFCB
