McCOY NAMED NRC SENIOR RESIDENT INSPECTOR AT VOGTLE NUCLEAR PLANT

U. S. Nuclear Regulatory Commission officials in the Region II office in Atlanta have assigned Gerald (Gerry) McCoy as the Senior Resident Inspector at the Vogtle nuclear power plant near Waynesboro, Ga. McCoy had been the Senior Resident Inspector at the Surry nuclear station in Surry, Va.

McCoy joined the NRC as a project engineer in the Region II office in September 1997. He was then assigned as a Resident Inspector at the Surry plant until he was promoted to Senior Resident Inspector last year. Prior to joining the NRC, McCoy worked as an engineer for ADI Technology Corp., an engineering firm in Arlington, Va. He also served in the United States Navy as a submarine officer.

McCoy holds a bachelor of science degree in physics from Marquette University in Milwaukee, Wis.

Each U.S. commercial nuclear power plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and interfacing with plant workers and the public.

McCoy joins NRC Resident Inspector Tom Morrissey and Site Secretary Marilyn Evans at the Vogtle site. The NRC office there can be reached by calling 706-554-9901.
