Subject: Hydrology personnel accompanying GeoTech Audit at Fermi 3

LaShawn,

Below is a list of the Hydrology contractors and what they would like to see on November 4, 2009:

The two contractors are John Quinn and Adrianne Carr - both US citizens and Argonne National Laboratory contractors to the NRC.

The best arrangement would be to have the contractors attend on Nov 4th.

Primary site features:

− current shoreline protection works

− Swan Creek

− NPDES discharge points for existing facilities

− current stormwater outfalls

− proposed locations of Unit 3 and its cooling tower

In addition, if possible, other site features:

− water intake structure, screen room

− existing cooling towers

− wastewater treatment facilities

− remediation systems (past or present) are there any??

− proposed location of blowdown discharge pipe to Lake Erie

− proposed location of Fermi 3 wastewater treatment plant

− system of canals and lagoons and their connectivity
