I know this is a late notice, but can we have a conference call tomorrow @ 8am?

This is what is going to be discussed:

RAI 3.7.1-1, the applicant was requested to identify the site-specific SSE and the corresponding OBE. The Applicant response did not address the site-specific SSE and the corresponding OBE. It appears that the Certified Seismic Design Response Spectra (CSDRS) is specified as the site specific Safe Shutdown Earthquake (SSE). Can you clarify and confirm that CSDRS (Certified Seismic Design Response Spectra) is used to design the site specific safety related structures and systems and components.

RAI 3.7.1-2, the applicant was requested to identify the appropriate FSAR Sections and Figures that address ground motion time histories. The figure for Horizontal and vertical Hard Rock SSE Spectra for the FERMI ESP Site was not found in the response. The applicant was requested to provide a location to the figure for Horizontal and vertical Hard Rock SSE Spectra for the FERMI ESP Site.

We(DTE) will be available for a call on Wednesday after 1:30pm. We would also request any additional information you may have on the questions the reviewer may have so that we can be prepared for the phone call. This would be benefical to both parties.

Thank you

I didn't get specific questions, she just said that wanted to discuss those responses. I'll try to find out and I'll let you know.

Hi Ilka,

I will check everyone's availability. Do you know what questions the reviewer(s) may have? I will not be available next week. I will be attending the GEH DCD Rev. 6 meeting.
