Subject: FW: Telephone Conversation with Craig Tylenda of DTE on RAI 4.3.1-6, 10/14/09, 11:20pm

Craig-- please review and confirm our notes.
Also, let me know when this will be completed and the RAI response submitted to NRC.

Thanks.....

Subject: Telephone Conversation with Craig Tylenda of DTE on RAI 4.3.1-6, 10/14/09, 11:20pm

Peyton Doub and Bruce Olson of NRC held a telephone call with Craig Tylenda of Detroit Edison (DTE) to discuss Request for Additional Information (RAI) 4.3.1-6 for the Fermi Unit 3 combined license (COL) application. The purpose of RAI 4.3.1-6 was to obtain statistics from Michigan Department of the Environment (MDEQ) on coastal and wetland acreage for Monroe County and on recent permit applications for filling wetlands in the county.

Mr. Tylenda had spoken earlier in the day with Katherine Davis of MDEQ. Ms. Davis indicated that MDEQ had not compiled statistics on wetland permit applications but indicated that DTE could request permitting data for recent years via the Freedom of Information Act. Peyton Doub noted, however, that independently compiling the statistics would constitute a large effort and that the information would therefore be, for all practical purposes, not reasonably ascertainable. He stated that, while the information would have helped the EIS place the cumulative impacts on wetlands into a regional perspective, the EIS could still be prepared without the information.

Ms. Davis had informed Mr. Tylenda that MDEQ has published geographical information system (GIS) layers of wetlands for Monroe County on its website. MDEQ has not, however, compiled a wetland acreage total for the County. Mr. Tylenda stated that DTE could readily compile the total using the GIS maps. Mr. Doub indicated that separate wetland totals for those parts of the county inside and outside of the Coastal Zone Management Act boundary would be helpful. The MDEQ has published the coastal zone boundary on its website.
