Subject: proposed uranium enrichment facility

Dear Nuclear Regulatory Commission,

Thank you for the opportunity to provide local input on the proposed uranium enrichment facility known as Eagle Rock. Your licensee would be the French company Areva.

I have a few concerns I would like to see addressed in the draft EIS. First of all, does Areva have a plan for the waste stream? If so, what is that plan? Will it be viable?

The proposed site for this project is on the edge of the Arco Desert, and lies above Idaho's Snake River Aquifer. What precautions will be taken to insure the aquifer is protected from contamination?

What kind of financial backing will Areva be bringing to this project? It seems the Idaho legislature has made this a proposal of regional scope. In that light, I contend that scoping hearings should follow suit, and be offered in Twin Falls and Boise as well.

I was present at the June 4th scoping sessions in Idaho Falls. I appreciated the time and energy you took in making that happen, and also the professionalism with which it was carried out.

Sincerely,
Katherine Daly
