Kirk,

Are we Ok regarding the NRC/E&E action item below?

Thanks,
Steve

Craig,

I have attached the notes summarizing our 6-18-09 conference call regarding the LOS Traffic Study. If you have any questions or comments on these notes, please let me know. Otherwise, please forward these notes to Mannik and Smith for action and to others as necessary.

There are two items highlighted in yellow in the notes that are action items, one for DTE Energy (DTE) and one for NRC/E&E. These are repeated below. Please let me know on DTE's action item as soon as possible, in terms of the ability to provide advance information and when it could be provided.

Action Items from 6-18-09 LOS Traffic Study Conference Call

- **DTE Action Item**: [Regarding NRC reviewing an advance copy of study, annotated outline, advance sections, assumptions that will be used in the analysis in terms of workforce, time periods, residency, and road usage or scope of work for review to ensure the study is on target.] Will check with management, but generally agree that this would be a good approach, at least in the reading room in Buffalo (DTE Tonawanda).

- **NRC/E&E Action Item:** [Regarding information in emergency evacuation report, COLA Part 5—Emergency Plan, Appendix 5.] E&E and NRC will evaluate for sufficiency and consistency with assumptions used in LOS analysis. Additional discussion may be needed after review.

Thanks,
Steve Lemont
