DEC 04 2009

Rodney D. Cadanau
Radiation Safety Officer
The Boeing Company
Mail Code S111-2491
P.O. Box 516
St. Louis, MO 63166

Dear Mr. Cadanau:

Enclosed is Amendment No. 62 to your NRC Material License No. 24-02261-03 in accordance with your request dated October 16, 2009. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please be advised that your financial assurance instrument will need to be amended to reflect the name change from McDonnell Douglas Corporation to the Boeing Company. Please address this amendment to Kevin Null, Senior Health Physicist, U.S. NRC Region III, Materials Licensing Branch. If you have any questions, please call Mr. Null at 630-829-9854.

Please note that License Condition No. 21 was modified to exclude the requirement to hold radioactive material with half-lives of less than 120 days for 10 half lives. The rest of the License Condition remains intact. This is in accordance with current licensing policy.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading-rm/sensitive-info/faq.html. A copy of this letter will be available electronically for public

The enclosed document contains sensitive security-related information.
