Consolidated Edison Co. of New York
ATTN: Mr. Stephen C. Salay
Chief Engineer
4 Irving Place
New York, New York 10003

Gentlemen:

This is in reply to your letter, dated July 10, 1973, regarding waiver of examination for Indian Point, Unit No. 2 operator and senior operator licensees, who will be seeking licenses for Unit No. 3.

One of our requirements, enumerated in our letter to you, dated June 16, 1973, stated that each licensee would have to be actively engaged in a licensed capacity on Unit No. 2 for a period of at least three months for us to consider waivers of examinations. This requirement was established so that we could make the findings pursuant to Sections 55.25 (a) and (b) of 10 CFR Part 55. However, this is not the only method available to us for making the above findings.

Individual applications for Unit No. 3, that request waiver of examination should contain information regarding education, previous nuclear experience and participation in the design, construction or testing of Unit No. 3, in sufficient detail so that we may determine if these items are equivilant to three months operating experience at Unit No. 2.

Of course, previous examination results are also used in determining whether to grant waiver of examinations.

I hope this information is of use to you.

Sincerely,

ORIGINAL SIGNED BY
P. F. COLLINS

Paul F. Collins, Chief
