Paul,

The comments provided below are for NRC RAI 5.2.2-4. We can discuss these comments during the January 14 teleconference.

Thanks,

Doug

NPD-NRC-2009-242 Supplemental Request:

In PEF's July 29 2009 supplemental RAI response (PGN RAI#: L-0522- RAI response letter NPD-NRC-2009-166), simulation results were provided that quantified the incremental change in the discharge to 1) rivers and lakes and 2) Big King and Little King Springs attributed to LNP operations . This same information was not provided for the recalibrated model in the December 14 supplemental response (PGN RAI#: L-0561- RAI response letter NPD-NRC-2009-242). Please provide comparable estimates of flux for the recalibrated model.

Please provide publication quality gray-scale and/or native files for the following figures for the recalibrated model:
PGN RAI#: L-0561- RAI response letter NPD-NRC-2009-242, Figure 2, TMR model grid and adjacent permitted users/springs
PGN RAI#: L-0561- RAI response letter NPD-NRC-2009-242, Figure 31, Simulated incremental SAS drawdown, 60 yrs at 1.58 mgd
PGN RAI#: L-0561- RAI response letter NPD-NRC-2009-242, Figure 17, Model water balance
PGN RAI#: L-0561- RAI response letter NPD-NRC-2009-242, Figure 30, Simulated incremental SAS drawdown, 1 yr at 1.58 mgd
