September 29, 2009

Mr. Philip N. McCullough, Vice President
Training and Accreditation
Institute of Nuclear Power Operations
700 Galleria Parkway, S. E.
Atlanta, GA 30339-5957

Dear Mr. McCullough:

Enclosed with this letter is the Annual Report on the Effectiveness of Training in the Nuclear Industry for Calendar Year 2008. This report is based on the NRC's (1) review of training-related issues derived from Human Factors Information System data, (2) observations of the INPO accreditation process, and (3) review of the results of operator licensing inspection and oversight activities. The report concludes that accredited training programs continue to meet the systems approach to training requirements contained in 10 CFR Parts 50 and 55. Although NRC monitoring has found instances of training program weaknesses at some licensee facilities, overall, all indicators suggest that the industry is implementing training programs in accordance with the regulations.

If you have questions on any of the topics discussed in this report please contact me at (301) 415-1004 or Mr. John McHale of our Operator Licensing Branch at (301) 415-3254.

Sincerely,

Frederick D. Brown, Director **/RA/**
Division of Inspection and Regional Support
Office of Nuclear Reactor Regulation
