Dear sir;

As I am a sport fisherman and deeply believe in ecology I would like to register my opinion regarding the Con Edison plant on the Hudson River.

I am thoroughly disturbed and disgusted regarding your negligence and lack of control regarding the protection of the Striped Bass and other fish

I am quite concerned with your system and prevailing conditions should be seriously considered and modified.

The atomic and nuclear plants may be a necessity but should have strong controls

otherwise. Where wild life cannot live Humans can not survive. The new generations will be deprived of all the wonders of nature.

Much obliged.

Andre. R. Peyronne

P.S. Also, I would like a copy of Final Environmental Statement on Consolidated Edison INDIAN POINT POWER PLANT Nº 2, docket number 50-247
