LISLE, ILLINOIS 60532-4352

SEP 14 2009

Thomas A. Schumacher, M.S.
Radiation Safety Officer
Roche Diagnostics Operations, Inc.
9115 Hague Road
Indianapolis, IN 46250

Dear Mr.Schumacher:

Enclosed is Amendment No. 09 to your NRC Material License No. 13-24532-02 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please contact me at either (630) 829-9841 or (800) 522-3025 if you have any questions or concerns about this amendment.

I updated Condition No. 16 of this license to clarify that you may dispose of radioactive materials with a physical half-life less than <u>or equal to</u> 120 days for decay-in-storage.

I added a new Condition No. 17 at this time because, although your license does not explicitly authorize the possession or use of sealed sources, your materials in Subitem Nos. 6. through 9. A. through G., inclusive, can be construed to potentially authorize sealed sources and as such, these materials would require testing for leakage.

This also refers to the change of ownership transaction described in your letter dated June 16 2009, which required an amendment to the license for a change in the licensed name. NRC hereby consents to the transaction as described in your letter dated June 16, 2009, which appears to be mostly a reorganization.

If you have further questions in regard to this request please contact me at either (630) 829-9841 or (800) 829-9500, ext. 9841.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure

for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
