Subject: Telcon Summary - Telcon with Lee 8/27/2009

On August 27, 2009, NRC staff (Tanya Simms and Tung Truong) participated in a telephone conference call with Duke representatives and observers (see below) regarding the staff's detailed review of the Lee Units 1 and 2 COL application. The purpose of the call was to provide clarity to requests for additional information (RAI) #538.

The discussion focused on clarification of the Regulatory Guide (RG) revision used of RG 1.97 in the reviewing of FSAR chapter 7.

At the conclusion of the call, Duke informed staff that they will review the information discussed and that Duke will contact the staff to discuss their findings. The NRC took a position to have a discussion with the meteorological technical staff to review possible actions that may come out of the discussion and schedule a follow-up call later.
