Zurich, SWITZERLAND

SUBJECT: NRC INSPECTION REPORT NO. 99990001/2010002, MWC INTERNATIONAL, NEW YORK, NEW YORK ADDRESS

Dear Mr. Kessler:

On January 12, 2010, Todd Jackson of this office traveled to 80 Broad Street, New York, New York, to determine if MWC-International was distributing timepieces containing radioactive material from that location to persons in the United States without the required NRC and New York City licenses. Mr. Jackson was accompanied by an inspector from the New York City's Office of Radiological Health. The 80 Broad Street address is listed as a business address on your company's website (http://www.mwc-international.com).

Mr. Jackson determined that MWC-International occupied no space at the 80 Broad Street location. On January 12 and 14, 2010, Mr. Jackson called the telephone number listed on the MWC-International website and spoke with Mr. Clinton Baines, an MWC-International agent in Canada. Mr. Baines stated that MWC-International has no physical presence at the New York City address and the address serves only as a mail drop. Mr. Baines was also aware of the requirements for licenses to distribute timepieces containing radioactive material in the United States. Mr. Baines stated that no timepieces containing radioactive materials are distributed by MWC-International in the United States and MWC-International does not ship such items to addresses in the United States. Within the scope of this inspection, no violations were identified. Mr. Jackson communicated this result to Mr. Baines during the telephone discussion on January 14, 2010.
