SUBJECT: PROPOSED AGREEMENT WITH THE STATE OF NEW JERSEY

You were informed of the impending Agreement between the U.S. Nuclear Regulatory Commission (NRC) and the State of New Jersey, whereby the NRC will relinquish regulatory authority for certain licenses of byproduct, source, and special nuclear material.

We also explained that your NRC license, which authorized licensed activities to be performed in New Jersey and at temporary job sites and/or permanent facilities anywhere in the United States where NRC maintains jurisdiction (non-Agreement States), required an amendment prior to the transfer.

This action is necessary since authorization to conduct licensed activities at temporary job sites and/or permanent facilities in NRC-regulated states will no longer be valid once the Agreement is signed and New Jersey assumes regulatory authority.

We asked that you review your current program and decide if you wish to continue unlimited licensed activities in States that are under NRC jurisdiction. In your response, you requested that NRC issue you a new license authorizing licensed activities in the State of New Jersey. You also requested to maintain your NRC license which authorizes licensed activities in the United States where NRC maintains jurisdiction for regulating licensed material (non-Agreement States).

We have issued you a new license (enclosed), according to your request, which will be transferred to the State of New Jersey and will become effective September 30, 2009. In addition, we have amended your current NRC license (enclosed) to only authorize licensed activities in non-Agreement States. Please note that the changes made to your current NRC license are printed in **bold** font.

Future amendment requests pertaining to your New Jersey license should be sent to:
Paul Baldauf, Assistant Director, Radiation Protection Programs, Division of Environmental Safety, Health & Analytical Programs, Department of Environmental Protection, P.O. Box 415, Trenton, New Jersey, 08625-0415.

Should you have any questions regarding this letter, please contact Ms. Toye Simmons at (630) 829-9842.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading-rm/sensitive-info/faq.html.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

Thank you for your cooperation.

Sincerely,

Colleen Carol Casey
