SUMMARY
We have reviewed your amendment request dated September 30, 2009, and November 30, 2009, and find that we need additional information as follows:

1. We cannot authorize licensees to release the areas (excepting areas covered by 10 CFR 35.13(e) and 35.14(b)(4)) or locations of use from licenses for unrestricted use (even by other members of their staff) until we have received and reviewed a copy of the results of decommissioning and close-out surveys for the facilities.

   Please respond by stating exactly which licensed materials were used at this location historically and please submit final status survey information covering those radioactive materials.

   The final status survey should consist of exposure rate measurements to show that all sources of radioactive material have been removed, and contamination checks of areas where radioactive materials were used or stored.

   Please submit the following information with your close-out survey (refer to 10 CFR 30.36(j)(2)):

   a. Diagrams of each facility with exposure rate survey and wipe test results keyed to specific locations, as appropriate.

   b. The name of the person performing the survey.

   c. The date the survey was performed.

   d. The instrument(s) used for exposure rate measurements and for analysis of the wipes.

   e. Background readings and each instruments' efficiency or correction factor.

   f. The date(s) that the survey instruments were last calibrated.

   g. The action levels for both exposure rate measurements and wipe tests. Include the identity of areas exceeding these levels, corrective actions taken and results of corrective actions taken.

2. Also, in order to release as an unrestricted area of use, please provide the most current leak test results for your sealed sources.

3. From our telephone conversation on December 4, 2009, please verify that PET radiopharmaceuticals will not be utilized in the new area of use.

We will be unable to continue processing your request until we receive this information. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice, " a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Record (PARS) component of NRC's document system (ADAMS) accessible from the NRC Website at http://www.nrc.gov/reading-rem/adams.html.

ACTION REQUIRED

Please submit a written response within 10-days or contact me to arrange an alternate response date. Be sure to reference control number 318573 to facilitate correct processing of your response.

If we do not receive a written response within 10-days, please note that we may void this request in order to enable you to prepare a quality response without time constraints. This would be done without prejudice to the resubmission of your request at a later date. Upon receipt of your response we will resume our review. Address your written response to my attention at the above address.

Please note that a "Void" is an administrative procedure that puts your amendment request "On Hold" (takes it out of our active casework database) until you reactivate it via submission of a written response.

Upon receipt of your response we will resume our review.

PLEASE DIRECT ANY QUESTIONS YOU MAY HAVE TO ME AT (630) 829-9892.
